SYRIAC GRAMMAR.

BY

GEORGE PHILLIPS, D.D.

PRESIDENT OF QUEENS' COLLEGE CAMBRIDGE.

THE THIRD EDITION,

REVISED AND ENLARGED.

CAMBRIDGE: DEIGHTON, BELL, & CO.;

LONDON: BELL & DALDY.

LONDON:

W. M. WATTS, CROWN COURT, TEMPLE BAR.

PREFACE TO THE SECOND EDITION.

THE following "Elements of Syriac Grammar" are intended for the assistance of those Students in Hebrew, who are desirous of extending their studies to the Syriac language. This object may be easily accomplished in consequence of the close affinity which exists between the two languages, both in their structure as well as in the multitude of words which they possess in common. By bestowing therefore a small portion of time and labour on the study of Syriac, the Hebrew scholar will be sure to obtain a moderate knowledge of the subject. It is indeed so nearly allied to Hebrew, and especially to Chaldee, that after he has read the Chaldee parts of the Bible he may at once proceed to the reading of Syriac. Such being the case, it becomes important that the student should avail himself of the assistance which the Syriac affords him for the better understanding of Hebrew; not to mention that by it he will be brought to an acquaintance with numerous ecclesiastical documents belonging to the early and middle ages, which treat of the creed and practice of the

Syrian branch of the church of Christ in those times. The Syriac, as a dialect of the Hebrew, must always be regarded as constituting a source of valuable information for the criticism of the Hebrew Bible. By an examination of a Hebrew word as it is used in this language, essential service has been rendered in elucidating many difficult and important passages of Holy Writ; and it has been the constant practice of commentators to have recourse to Syriac, whenever the Text of the Old Testament fails to establish satisfactorily the signification of a word. In such case every person allows that a reference to Syriac is one of the legitimate means to be employed in determining the sense of a passage; and although this language is inferior to Arabic in the extent and variety of its literature, it is nevertheless superior as regards its much more intimate connection with the original language of the Bible.

But the great claim, as it appears to me, which the Syriac has on the attention of that class of persons, for whose use this book is intended, consists in the Syriac New Testament. The high antiquity of this version, and its use in the early established Syrian church, stamp an importance on it which can be assigned to no other: and if, in addition to these circumstances it be borne in mind, that the Syriac

language is so nearly the same as that spoken in Palestine in the first age of Christianity, that by many persons it has been termed the vernacular language of our Lord, it must be allowed that the Syriac New Testament possesses a value inferior only to that which belongs to the original. Michaelis, who devoted his great talents to the study of Syriac, and to an examination of the Syriac version, has endeavoured, in his Introduction to the New Testament, to fix the period when that version was made; and after bringing forward many cogent arguments in favour of its high antiquity, has inferred that it must have existed, either at the end of the first or the beginning of the second century. This great age, and its frequent deviation from the common reading in passages of importance, must recommend the use of it to every critic; and the truth is, that it has been more used than all other sources of critical assistance together.

From these remarks it will obviously appear desirable that the Hebrew scholar should not rest satisfied till he has obtained a knowledge of the Syriac. To afford facility for this attainment was my great inducement in sending forth, a few years ago, these Elements of Syriac Grammar to the public; and I rejoice that the book, having been favourably received,

has afforded me satisfactory proof that the publication has not entirely failed in being useful. The copies of the first impression having been sold off, I have now the pleasure of presenting a second Edition, containing many amendments and additions, which have been made for the purpose of adapting the Grammar to the somewhat more advanced state to which Syriac literature has now gradually arrived.

In introducing these additions the plan of the Grammar has not been at all disturbed, and I think I may cite, as equally applicable to this republication of the book, the words I employed in the preface to the first Edition when speaking of the manner in which it was executed. "I have endeavoured to be simple in the arrangement, to account for the vowel changes, and the various inflexions of words by the operation of a very few principles, and to exhibit in a concise form the general structure of the language."

PREFACE TO THE THIRD EDITION.

In this Edition of the Syriac Grammar I have introduced a considerable quantity of new matter. To make room for it, the Chrestomathy, which appeared in the second Edition, has been omitted. In the course of the last twenty years many Chrestomathies and Syriac books have issued from the press. These I consider supply ample assistance to the student in his early attempts at translation. Again, the study of Syriac has of late years made beyond all doubt an advance in this country. There are not only more persons who at the present time apply themselves to the language; but there is also a larger number of mature scholars than England could lay claim to a quarter of a century ago. For these reasons it appeared to me that the space in the second Edition, which was taken up with Chrestomathy, might in this be much more usefully filled by the introduction of additional Grammar. Whatever new forms or inflexions of words, or whatever new constructions have been discovered in the Syriac MSS., which have been recently edited, I have taken care to bring before the notice of the student. I think there are few points of Grammar which will not be

found touched upon in the following pages. Its laws and principles I have endeavoured to develop, and, in accordance with them, to classify the nouns, and to explain the irregularities in the verbs, and the changes which words undergo in the process of inflexion. I trust, therefore, that this new Edition, since the elementary character of the former Editions is preserved, whilst the higher parts of Grammar are introduced into it, will be thought adapted to meet the wants of the beginner, and will also, to some extent, be found profitable to the riper student. I might have made a larger book by greatly increasing the number of examples; but a larger book than necessary ought on every account to be avoided, and a rule of Grammar may in general be as well illustrated by one or two examples as by twenty.

APPENDIX

INTRODUCTORY OBSERVATIONS.

THE Syriac language, a branch of the Shemitic family, was the vernacular tongue of Syria for many ages previously to the Christian Era, and continued to be so till the period of the Mohammedan invasion of the country, when Arabic was introduced as the language of the conquerors, and in a short time entirely superseded that which had been heretofore in use. also called Aramæan, as the country itself had anciently the designation of Aramea or Aram probably, as is supposed from Aram the son of Shem, by whose descendants it was peopled. This name seems to have obtained in very remote times, being known to Homer, who calls the inhabitants 'Apluoi, II. II. 783. word is found in 2 Kings xviii. 26; Isaiah xxxvi. 11; and Daniel ii. 4.

The early history of the Syrians is but little known. With the exception of a few particulars, which may be gathered from Scripture, little can be said about them till the time they were carried away into the kingdom of Assyria. It is considered that the descendants of Ham were the earliest inhabitants of the country. The Scripture evidence on this point rests

on Gen. x. 6, 15, 18. It seems that some time before that of Abraham, these occupants began to be supplanted by the posterity of Shem. This appears from the Shemitic names prevalent in the country, when Abraham first entered it; such as Shemeber, Abimelech, Melchizedek, &c. David, after waging war with the Syrians, having been successful in many battles, compelled the country to submit to his government. After the kingdom of the Jews became divided into two, the Syrians delivered themselves from foreign subjection; but only to be made a part of the great Assyrian empire. Subsequently it passed to the Babylonians, then to the monarchs of Persia; but soon after the conquests of Alexander, it fell under Greek rule, and became more prominent among the nations. Sciences, one of Alexander's generals, after the death of his master, was made governor of Babylon, and, tempted by the example of his brother generals, set up for himself, when, after obtaining some victories over Antigonus and Nicanor, he took the title of king of Babylon and Media. He continued on the throne till his death, when he was succeeded by his son, and so on, the country being ruled by his family for several generations, the last of whom was Antiochus, who began to reign B. c. 225. This monarch, possessed of great military talents and being very ambitious, soon engaged in the design of extending his kingdom. Accordingly he undertook an expedition against the Parthians, whom he obliged to

conclude a peace on very advantageous terms. afterwards gained victories in Bactria and India. the year 204 B.c. he entered into a league with Philip of Macedon against Ptolemy Epiphanes, the king of Egypt. He defeated the Egyptian general, and recovered all Palestine and Colosyria. After this he invaded Asia Minor in the hopes of reducing it also; but the free cities had recourse to the Romans, who soon made a declaration of war against Antiochus, vanquished him first at Thermopyle, and afterwards so completely at Magnesia, that the issue of the battle was, that Syria became a Roman province. Such being, in a few words, the history of the country, we might infer that the language would, after the people had mingled with the Persians, partake of the Persian Idiom; that many terms and phrases would be common to both languages; and this we find is the case. Again, for the same reason, many Greek and Latin words have crept into the Syriae, as we perceive from the Peshito version of the New Testament, but more especially from writings of a much later date, such, for instance, as the Chronicles of Bar-Hebreus. Most of these words are nouns, and some Greek particles are introduced; but very few verbs appear to have a foreign origin. We will subjoin a few examples of such terms, both as they appear in the Syriac and in the original.

Greek words.

3. Latin Words.

مثر	velum,	, i	صُبِءاً	candela.
د: المسكنة	charta,	وأبأو	وهايم	quæstionarius.
ذكهب	palatium,	1	مُؤْودًا	carruca.
مُكُمُّا	cella,	ľ	"لمحكرًا	tabellarius.

The Arabs and Turks, from their connection with the country, have also exercised an influence over the Syriac language. The Crusades, too, were the means of getting some European words, chiefly proper names, and titles, introduced into the Syriac, thus we find count, prince, marquis.

The Syriac and Chaldee are evidently dialects of the same language, their differences, which are very small, consisting nearly as much in the pronunciation as in grammatical inflexions and constructions. See the Preface. The former was spoken in Western Aramea, and the latter in the Eastern, viz. in the province of Babylon, between the Euphrates and the Tigris.

The most ancient Syriac writings are said to be the apocryphal Letter, which Abgar the king sent to Christ, and our Lord's answer. There are also those who think that the original of St. Matthew's Gospel was written in Syriac. Be this as it may, there is no doubt of the very early existence of a Syriac version of this and of the other Gospel's, and it is perhaps the oldest document we know of; for the letter of Abgar was most likely written long after the period to which it refers.

The Syrians, like many other ancient nations, have laid claim to the invention of letters; but those who have investigated this subject, supposing the art of writing to be a mere human invention and not a divine gift, are inclined to assign the discovery either to the Egyptians or Phænicians. From the Phænician or Chaldee characters, they suppose the Syriac were derived, as well as the Arabic.

The are two sets of Syriac letters, the one being a modification of the other, or both of them having a common original. They are called the Estrangelo and Peshito. The former is found in the oldest MSS., and in many monumental inscriptions. It is written in Syriac price, which Assemani, in his Bibl. Orient. Tom. IV. p. 378, supposes to be the same as the Greek word στρογγύλος, round; but as roundness is not a characteristic of this alphabet, J. D. Michaelis and Adler have sought out another etymology, viz. the Arab. سطر, a writing and إنَّجيل gospel. The latter is more modern, and is the one which is generally used by the Maronites and Jacobites. The origin of these characters is uncertain. It is ordinarily assigned to the seventh century, and it is said that they were introduced by Jacob of Edessa. It is most likely, however, that they were gradually developed, and underwent several modifications, before they assumed the precise forms which we now have. It is supposed that the Estrangelo letters were employed in copies of the Scriptures, whilst the Peshito alphabet, because it could be written with much greater rapidity, was that which was in use for the common purposes of life.

The Nestorians use characters partly resembling the Estrangelo, and partly the Peshito; they occupy as it were a middle place between the two alphabets; and persons accustomed to read these, may readily make out the Nestorian. It has been very much the practice of the Syrians, since Arabic became the spoken language of the country, to write it with Syriac letters. This mode of writing is called, after the name of the inventor, Carshunic.

§. 1. The Syrians, in common with many other Eastern nations, read from the right hand to the left, and have the same number of letters, which are all consonants, as the Hebrews.

The following Table exhibits their forms, names, powers, and numerical values.

				l'or v	b			ž
				FIN	AL.			, in ax
NAMI	29.	INITIAL.	MEDIAL,	CONNECTED	NOT CONNECTED.	ESTRANGELO.	rowles.	MARKI AL NEWI PES

Shin	_ _ _		•		-	×.	Sh	300
Thau	04	2	Δ	Δ	2	y	т, ти	400

Care must be taken to distinguish between the following letters, which have nearly the same figure, and differ chiefly in their magnitude.

It may be also observed that one letter is joined to another by a small horizontal line drawn from its extremity; as, on in only. The exceptions to this are ? ? i and 2, which when joined to another letter assume the forms ? ? and A.

The following compound characters are frequently used.

As letters of the same organ are frequently changed for one another in the process of derivation, Grammarians have divided the whole Alphabet into classes according to the organ of speech by which they are enounced.

Gutturals	Ì	6	**	V	
Linguals	?	4	<i>"</i> ,		÷
Palatals	1	•	۵	æ	
Dentals	1	B	3	į	•
Labials	J	0	عد	ھ	

The consonants | o a, frequently become quiescent, i. c. lose their power as consonants; as is the case with the Hebrew אוני series.

2. Vowels.

It is probable that the quiescent letters 10 - were used in the early stages of the language as vowels, and were the only vowels which in those times were known. The consequence was that many words were not sufficiently defined in writing, and that a vowel was often understood, and had to be supplied in speaking. To meet this defect, which existed at one period or another in the whole family of the Shemitic languages, a system of punctuation came gradually into The first step taken to meet the wants of the reader was the introduction of a point, which by its position, above or below a word, indicated the proper vowel. The employment of it, however, was very partial, and its primary object, perhaps, was little more than the determining of those words which, without it, would be ambiguous. (See Appendix.) When this point was first introduced into the written Syriae it is now impossible to ascertain. Many Grammarians have assigned its invention to the school of Edessa; but although historical testimony on this matter is very

imperfect, we are nevertheless inclined to go back to a more remote period. It is pretty certain that it, or something equivalent to it, must have been employed in the third or fourth century, and perhaps much before that time; for Ephraim must have found some note of distinction in Gen. xxxvi. 24, in his comment أَدِع كَعُرِّ بِخَرِّكُمْ كَمُونَدُ مِصْدَا المَدْسِدِ on which he says : إَدِع كَعُرِّ مِنْ الْمُحْسَلِ لا حِثْ حِمِيْنَ وَالْكُونِ مِنْ الْهُونِ وَلَا يَا الْهُونِ وَالْعَدِينِ وَلَا لِلَّهِ اللَّهِ اللَّهِ اللَّ l'and. It is proper to observe, that till now we find in both Testaments, and not معكنة in both Testaments, and not have ignorantly thought. In this observation, Ephraim must have had some mark whereby he could distinguish مُعَدَّ from مِعَدَّة; and it is likely, if we had works older than those of Ephraim, we should be able to recognize a mode of distinguishing in them the meaning of one word from that of another consisting of the same consonants, and that mode would probably be by the point we are here speaking of. It is quite clear, however, that had this point been as extensively employed as it is capable of being, still it would be quite inadequate for the purposes for which it was intended. The precise vowel could not be known by such a mark; and hence Grammarians set themselves to work to devise some other method of more fully defining the sense and pronunciation of words. the Greek language and literature were much known to the Syriac scholars of the time to which we have referred, and their attention having been brought to the imperfect condition of their vowel system; and, further, having been able to observe the accuracy of the Greek, they perceived that its vowels might be advantageously engaged in the service of their own language. Two modes of representing the said vowels were adopted about the same time: one was by means of one or two points being placed in different positions, and the other by writing above or below the consonants the Greek signs themselves, with some slight change in their forms. This system of punctuation was originated by Theophilus of Edessa, according to Assemani (see his Bibl. Orient. Tom. 1. p. 64), and was advanced step by step till it was brought to its present state of perfection. Theophilus died about the year 791 of our era.

Vowels, by native Grammarians, are called sometimes by one and sometimes by another of the following names: المُنْفُ vocals; إِنَّانُ positions; المُنْفُ positions; المُنْفُ positions; المُنْفُ positions;

The following Table exhibits their names, powers and forms:

	Names.	Power	. Figu	ure. Greek.	
حذسا	Pethocho	a	÷	ٽ	Alpha (A)
زحوا	Revotso	e	.j.	ت	Epsilon (E)
سعى	Chevotso	i	ب	J	Iota (1)
اعجا	Zekofo	0	څ	Ś	Omicron (O) † /
335	Etsotso	u	نه ده	ث	Upsilon* (Y)

^{*} The figure of the vowel Etsotso may have come from that of the diphthong ov. The form of the vowel is frequently observed in MSS. to be °Y.

The points of the vowel Zekofo may coalesce with the point of the letter; as Ani Roh-tin.

The vowel Etsotso is always accompanied with except in the two words $\hat{\omega}$ cul, $\hat{\omega}$, metul.

When no vowel is expressed, then, as in the Hebrew, a Sheva (quiescent or moveable) will be implied and read accordingly.

Vowels may be divided into two classes: pure, i. e. those which complete their syllables: impure, i. e. those which do not complete the syllable without the addition of a terminating consonant.

Pure Vowels are

Impure Vowels are

Final syllables are often, as in Hebrew, anomalously long, on account perhaps of the accent; as,

مال المال على المال الم

3. Diphthongs.

There are several diphthongs made by the letters Vau and Yud, which, losing their own powers, coalesce with the preceding vowel and form one syllable.

Vau makes four diphthongs au, eu, iu, ou,

The first occurs at the beginning, middle and end of words, and is produced by the vowel preceding o; as, so au-kel, he fed, post tsau-mo, the fast, and ho-nau, this is.

The second, eu, is produced by the vowel preceding as; as agastal, Esh-ten, I will drink it.

The third, in, by a chevotso preceding; as, sould be will slay him sould in, n'shad-rin, he will send him.

The fourth, ou, is when a radical o is preceded by another o with a ; as, in shou-do-yo, a promise.

Yud makes two diphthongs, ai and oi: ai by before as, as, fill, thou hast renealed: oi by before as, as, on hoi, she.

4. Properties and Changes of Consonants.

Consonants possess various properties and undergo certain changes arising from the influence of vowels, or other causes, which we proceed to mention.

The letters 1 o -, when they are not pronounced.

but rest in the sound of the vowel on the preceding letter, are called *quiescent*.

Olaph final rests in or ; as, it the man, it the men; except in a few verbs, such as the polluted, is he comforted, is he polluted, is he was decorated.

Olaph in the middle of a word rests in or ; as, المائة to eat, عالم to say. Yud is sometimes changed into Olaph quiescent in ; as, عدمائة to beget, for عدمائة to beget, for عدمائة على المائة على ال

Yud usually rests in or =; as, منه he begun, مما is, جن but.

Vau deprived of a vowel is for the most part quiescent in ,; as, so rise, so day. It is also used as the fulcrum, or, as it is technically termed, the mater lectionis of this vowel; as, so he will kill.

In foreign words Vau is frequently found to be quiescent in the vowel; as, moits Peter, moist throne.

The letters | o are frequently not pronounced; but they are nevertheless written for the sake of orthography or etymology. In such instances these letters are said to be otiose.

Olaph in the pronouns (OA) and (AA), when they are added to participles for the sake of forming the present tense, is otiose; as, (OA) (AA) kot-litum, and kot-loten, ye slay, masc. and fem.

Vau and Yud, in certain persons of the verb, are

also otiose; as, a k'tal, they slew, 3rd. pers. plur. præt. masc. k'tal, they slew, 3rd. pers. plur. præt. fem. a k'tal, slay thou, imper. sing. fem.

Yud is likewise otiose in the pronoun all al, thou, and in certain affixes; as, when a malk, my king, and k'tho-bhek, thy book. Also in some substantives and adverbs; as, when the standard shel, tranquillity, when the standard shell it is a shell it.

In the above cases o and were pronounced in ancient times, as is evident from the usage in Arabic and Hebrew; for we have also in the New Testament ἡαββουνὶ, John xx. 16; ταλιθὰ κοίγιι, Mark v. 41; and similar expressions.

Consonants are sometimes omitted in writing, especially the weak letter]; as, |2; end for |2;], particularly in compound words; as, mun for |2;], of for | of although. The initial radical & of Hebrew words sometimes altogether disappears; as, one, Heb. The Words which have the middle radical doubled, on many occasions lose one of them; thus we have in for it he perceived, onest, from it.

Vau and Yud fall off in nearly the same manner and the same situations as in Hebrew, which may be immediately observed by inspecting the paradigms of the classes of verbs beginning with these letters.

Letters are sometimes added to words for the sake of cuphony. Thus, Olaph is prefixed to some words beginning with Yud; as, أباً hand for أباء إلى day for إلى إلى المعامل أباء أباء المعامل المع

Greek nouns, which commence with two consonants, are usually written with an Olaph at the beginning; but sometimes without; as, work or work of Stephen; (a. In stadium; line) sphere; sphere; scheme.

Olaph prosthetic occurs also in the verbs and and as, he drank, and he found.

We have also אָנְבּוֹר hero from אָנַבּוֹר Heb. אָנָבּוֹר, where the Nun seems to be a compensation for the Dagesh forte in Chaldee and Hebrew.

A great number of Hebrew words become Syriac by the change of one or more of their letters.

ì	is changed into	?	as,	זַהָב	gold,	ڊِهڪڙ -

5. . Changes of the Vowels.

Inflexions of words are in numerous cases effected by a change of vowels, certain vowels being selected as characteristic of different forms of the same word. The correspondence between Syriac and Hebrew vowels is as follows:

Pethocho (י) corresponds to Patach (-); as, סצבבי, his king.

Revotso (-) generally to the Hebrew -; as, בُבُבּב,, thou shalt visit, אַבּבּבוּל, thou shalt visit, אַבּבּוּל, thou shalt kill.

Chevotsô (י) to the Hebrew ...; as, בּאַ or o בּאַ for עַשֵּוֹל Esau.

Zekofo (๑) to Kamets ¬; as, אָרָם, וֹּיֶּלֶ חִנֶּה mun, וֹנֶלָה mun, וֹנֶלֶה he revealed.

Etsotso (*) to Cholem, Kamets Chatuph, Shurek and Kibbuts; as, בל לל, בֹל, בֹל , לֹבָי ; לְרֵשׁ , holiness, בֹל על , בֹל , בֹל , בֹל .

Olaph in the beginning of a word, and also Ee in the same situation, when followed by on, instead of being according to analogy without a vowel, will receive a vowel, for the most part or ; as so for vos.

Yud observes the same rule at the beginning of a word, and takes the vowel =; as, is he begat for is.

The foregoing rule holds good also for the letters Olaph, Vau and Yud, when they begin a syllable, the vowel in such places being remitted to the preceding letter, if it has been previously without one; except when the Olaph, Vau or Yud is followed by two consonants in the same syllable. A full exhibition of these principles may be seen by looking at the irregular verbs.

Vowels are sometimes cast away: when another syllable is added to a word, the final vowel is cast away; as, is the feminine of is he visited. But it is preserved, 1st. if a letter only be added; as, if the consonant from the analogy of the Hebrew ought to have a Dagesh forte; thus if the definite state is forte; thus if people; in the definite state is 3rd. the vowels is and are preserved; as, if the vowels is and if the definite state is 3rd. the vowels is and are preserved; as, if the vowels is cast away: when another syllable is added to a word, the final vowel is cast away: when another syllable is added to a word, the final vowel is cast away: a he visited. But it is preserved; as, if the vowels is cast away: another word, the final vowel is cast away: a he visited. But it is preserved, 1st. if a letter only be added; as, if the consonant from the analogy of the Hebrew ought to have a Dagesh forte; thus is people; in the definite state is in the definite state.

Zekofo in nouns of the definite state, when it is

followed by on is, is changed into Pethocho, so that it may make a diphthong with o; as, on his is, for law, he is a liar, for on his; and ho-nau, this is, for on his.

Transposition of vowels takes place, especially in nouns of one syllable; thus, in man, definite state in man, def

6. The Diacritic Points, Kushoi and Rukok.

The Syrians have no marks exactly corresponding to the Dagesh forte and Raphe of the Hebrews; but they use a point for the letters America.

This point, when it is situated above a letter, takes away the aspiration, and, when placed below, preserves it. In the former case it is called hushoi, which signifies hardening, and in the latter his Rukok, softening. In Manuscripts these points are made with red ink.

Kushoi is used with the above-mentioned letters, when any one of them begins a word; as in som, man. But if one of the letters is one be prefixed, then the radical Assimple receives a Rukok; as, lini, lini.

If one of the letters $| \circ |$ precedes one of the happy, the latter takes the sign Rukok; as, if $| \cdot | \cdot | = I$ a creature; $| \cdot | \cdot | = I$ chosen.

If the first letter of the noun be without a vowel, then the second will receive a Rukok; as, i. 2 breaking, i.j. filth.

Of those nouns having to the first letter, and consisting of four letters, the third takes a Kushoi; as, sin, المُعَدِّة a house; if, however, the noun be feminine, then the third letter receives Rukok; as, المُعَدِّة a daughter, المُعَدِّة a female slave, المُعَدِّة a garden.

If the noun consist of five letters, the third has a Kushoi, and the fourth a Rukok; as, اعتف ع star, م عنف ع queen, المنف ع generation. There are, however, a few which take a Rukok on the third, and a Kushoi on the fourth; as, اعتف ع teacher, المنف ع a walk, or path, المنف ع edition.

Again, with respect to nouns, consisting of six letters, the third takes Kushoi, but the fourth and fifth Rukok; as, it candle, disciple,

^{*} In this and the following remarks, when a Kushoi or Rukok is spoken of as attached to a letter, a Assign letter is always meant.

אָרְאָלְ knowledge. A few nouns receive Kushoi in the fifth; as, אָבָה מֹל addition, אַבּה לוֹב clothing.

If ' be placed to the second letter of a noun, then the third letter, if it possesses a vowel, will take Kushoi; as, |2, new, | splendour, &c. But if the letter which follows ' be without a vowel, then the one after this will receive Rukok; as, |A, o where, | have a Kushoi on the fourth letter, viz. |2; o which island, |2, a heifer, |2, o burning, and | siland, |2, o where we chariot.

The letter after , if it be without a vowel, receives a Rukok; as is a finger, is a fool, is an ear, is wisdom. There are a few exceptions, which are mentioned by Sciadrensis.

When nouns consist of four letters, the first having , the third will take Rukok; ar, الْمِكُ a word, الْمَاءُ a wing. Exceptions are الْمَاءُ a wing. Exceptions are الْمَاءُ a hole, الْمَاءُ evening, الْمَاءُ ornament, الْمَاءُ hair, الْمَاءُ pitch.

If the vowel * be placed on the second letter of a noun, then the third letter, if it have a vowel, receives a Kushoi; but if it be quiescent, then it takes Rukok; also, if after this there comes another letter, it receives Kushoi; as, land a vine, land cheese, land a plant, land phlegm, land a heifer.

A letter, which comes after ', whether it has a

vowel or not, always takes Rukok; as, المنت victory, المنت vork, أبك a disciple; but if another letter comes between, then the معني receives Kushoi; as, المنات just, الأباء a congregation.

If a letter of a noun take, then the following one, whether with or without a vowel, has Rukok; as independent good, in fruit.

The letter of a noun which comes after the vowel , if it be itself without a vowel, receives a Rukok; as, أَحُمُ beauty, أَحُمُ first-born; but if the said letter has a vowel, then the point attached to it is Kushoi; as, المحكومُ a coat.

A letter elided, as there is no compensation by Dagesh, the elision is indicated by Kushoi; as in verbs, as, and a and their derivatives; as, and for camal ye will slay.

These points serve to distinguish several words which have the same letters and vowels; as, liminal disgrace has a hard, and liminal pity has a soft; livinal a heap of corn has a hard, and livinal joy has a soft. This is also the case with verbs in many instances; as, of he drew him, with soft and a hard, is distinguished from of he struck him, with hard and a soft.

In many words, which have been imported into the Syriac from the Greek or some foreign language, the aspirated letters are accustomed to be pronounced in the same way as they are in that language from which they are derived; as, $m ilde{ } = 1$, $\chi \lambda a \mu v s$, $m ilde{ } = 2$, $\theta ilde{ } = 2$, $\lambda a \mu \pi a s$: π of the Greeks is in Syriac represented by $\dot{ } = 1$ and $\dot{ } = 1$ by $\dot{ } = 1$, $\dot{ } = 1$ by $\dot{ } = 1$, $\dot{ } = 1$ by $\dot{ } = 1$, $\dot{ } = 1$ by $\dot{ } = 1$

According to Amira and other native grammarians, Kushoi never doubles a letter; but on the other hand it must be said that the Eastern Syrians in this respect followed the analogy of the Hebrew. We have also Paß, Master, John iii. 2, and in the writings of St. Paul we have Aßß, Father. If this duplication be not admitted, then it is important to state that in such cases where it would be implied, the preceding vowel will complete the syllable; thus,

7. Ribui.

Many nouns and verbs have the same form in both numbers. In such cases it was found necessary to employ some mark of distinction. For this purpose Grammarians have invented the sign Ribui (iconsisting of two horizontal* dots (") placed above the word to denote the plural number. The following words will illustrate the use of this sign.

^{*} Ribui is usually placed obliquely in \(\simega \) and \(\sigma \); thus, \(\sigma \), \(\sigma \).

A plural noun ending in a or has no need of the sign Ribui; since the number is already indicated by the termination, but still the sign is often added.

It is sometimes used with a noun of multitude; as, عُناً a flock of sheep, to distinguish it from عُناً a sheep,

If the word taking Ribui have the letter Rish, one of the points commonly coalesces with the point belonging to Rish; as, i a herd, i men. In MSS., however, we also find i or i...

It sometimes coalesces with the vowel Pethocho, when it is expressed by points, thus, anopia his foundations for anapla.

Prepositions with pronominal affixes referring to plural nouns receive these points; as, voring.

To this rule there are some exceptions; as, pio and win, which are never seen with this sign.

The numerals, according to some grammarians, do not receive the dots except when they are joined to pronominal affixes; as, الْكُذِر بُوتُدُلُكُذِ لِهُ اللَّهُ اللّلْمُ اللَّهُ الللَّهُ اللَّهُ اللَّهُ الل

Besides the name , which is given to these points, they are also called by native grammarians, positions, Edd drops, &c.

8. Lines.

A small line is sometimes found above and sometimes beneath a letter of a word.

It is found above a letter principally in the following instances,

- 1. In abbreviated words; as, in for holy, on for and that is.
- 2. When letters are used to express numbers; as, 13.
- 3. In the Particle of Exclamation of O / to distinguish it from the particle of or.

When it is found beneath a letter, it directs that such letter is not to be read, and is therefore generally called the *linea occultans*. Thus, 2: Bath not barth, a daughter. It is found,

- (1) In nouns with the middle radical doubled; as, المُعْنَدُ manna, الْكِلَا a hill, كَتَّنَعُ nations.
- (2) With Olaph in the beginning of a word in several instances; as, if a man, him another, him last; especially in the pronoun his, as often as it is used in the place of the substantive verb; as, his his I am.

- (3) With Dolath when it is without a vowel before Thau; as, 12, new.
- (4) With He in the following cases,
- (a) In affixes; as his kings, he called him.
- (b) In the verb for was, when it is redundant, or when it assists in forming the imperfect and pluperfect tenses; as, for was, for he was ordering for he had ordered. But when it is used in the sense of to be, to exist, the line is not found.
- (c) In the pronouns of and on, when they are put for the logical copula; as, on one my body it is.
- (d) In some words which are derived from the Greek and Hebrew; as, معرفة Rome,
- (e) In the verb he gave.
- (5) With in in, when it comes after the active participle used as a present tense; as, in we create.
- (6) With Lomad in some forms of the verb will go.
- (7) With Nun in the four pronouns الْمَحَا أَنْكُمُ الْمُعَالِينَا اللَّهُ الْمُعَالِقَةِ اللَّهُ الْمُعَالِقَةِ

رُمُماً, مِمَاً, and in some nouns; as, الْمِعِيثِ the ship.

(8) Rish in غربات a daughter, and خربات for خربات المناس a city, المناس a time, عدر a side, المناس a year, اثنات strong.

When a line is found under a letter in a verb of the imperative mood of a passive conjugation, it implies that such letter is deprived of its vowel; as,

9. Marhetono and Mehagyono.

In many words, when two letters come together, each without a vowel, a line is placed sometimes above and sometimes below the first of these letters. In the former case it is called Marketono (12,50,50 making to run, from Lois to run), and in the latter Mehagyono (المرسف) according to Amira from har to meditate; but according to Hoffman and others from the Arab. a to connect; for the two letters by this sign are connected and make a syllable. These lines seem to be used only in certain words, and in the first instance for purposes of poetry. The poetry of the Syrians, as appears from the specimens which remain, (see for instance the hymns of Ephraim,) consisted in having a certain number of syllables in a line; and hence it would be convenient, in many cases, to give to some words an additional syllable. To indicate this addition, a line was put beneath the first of the two letters without a vowel, which had the force generally of Revotso, but occasionally of Pethocho; as, $|\mathring{\Lambda}_{0}|$ i.e. $|\mathring{\Lambda}_{0}|$ α ring; $|\mathring{\Lambda}_{0}|$ i.e. $|\mathring{\Lambda}_{0}|$ fear. When this additional syllable is in such words not required to complete the measure, the Marhetono is written, and denotes that its letter and the following have no vowels. It corresponds to the Sheva in Hebrew, except that the latter is employed according to general rules, whilst the former is used only in particular words, and in these words only under certain circumstances. Grammarians, however, are not fully agreed as to the primary use and signification of these lines, and it is not now of much consequence, if we cannot make ourselves fully acquainted with them. It is supposed, by some persons, that the Mehagyono is found only when the following letter is ; $\sim \sim >$; but to these, others add σ , others \longrightarrow , and others • o). Again, whether every word which has one line, must, in a different situation, have the other; or whether some words have only one of the lines and others only the other, it is impossible to say, and happily it is not important to determine. Whoever is curious to know more of this subject, may have his curiosity satisfied by consulting the chapter on these lines in the Syriac Grammar of Sciadrensis, in p. حد.

10. Other Diacritic Points.

It has been stated, in page 10, that a point was sometimes used which, by its position either above or below the word, would determine the true pronunciation and meaning; when without it and without the vowel points, it would be ambiguous: thus, as for as to him; as for as to her. It is also frequently used as a note of Interrogation, Exclamation, Admiration, Command, &c. For a further account of the various offices which this point performs, see the Appendix.

There are also certain signs for marking the end of a sentence, and subdividing it into clauses, of which the following are the principal.

- (1) At the end of a section or paragraph are found four points (*) or (::),
- (2) Two points placed obliquely from the right hand towards the left, finish a clause, and are equivalent to our colon; thus, the multitudes.
 - These points are sometimes put as a sign of interrogation or exclamation.
- (3) Two points placed obliquely from the left hand to the right, thus (.), split the clause

into different members, and are equivalent to our comma or semicolon. They are frequently placed perpendicularly (:).

written under the last letter of a word is the shortest pause, viz. a comma; as, μ . These points are sometimes found after a long interrogation, see Matt. xii. 10.

(4) One point frequently ends a period.

11. On the Pronunciation of certain Letters when they are under peculiar circumstances.

These letters are differently pronounced in different situations. Olaph is pronounced as Yud,

- (1) When it is preceded by another Olaph; as, if oyar, air.
- (2) When it is followed by another Olaph without a vowel; as, اعداله m'loyo, fulness.
- (3) When it is the second letter of the participle peal; as, > 1/3 tso-yem, fasting.

Vau is pronounced as v when it begins a word or syllable; as, ova, ove, ovi: in other places it has the sound of u or v.

Yud in the beginning of a word with the vowel is not pronounced. It preserves only the sound of its vowel; as, if Inek, he sucked; if Ikar, he was heavy. Hence we find that before a Yud of that kind Olaph is sometimes placed, and the vowel belonging

to the Yud is transferred to the Olaph; thus, in a hand, from the Hebrew T, is written in We have also find glory, we have also find glory, we. The pronunciation of either word is the same.

when followed by a letter with Rukok, or by either with a Rukok or Kushoi, is pronounced like m; as, 141 gestho, wool; in s'ko, he conquered. Some persons add that 1 is so pronounced when a comes after it; as, in s'kifo, a cross. when followed by one of the letters in, is pronounced like 1; as, in chezdho, mercy; is pronounced these letters has the force of in; as it is rektho, lust; land ezktho, a ring.

12. Accent.

Grammarians have given a few rules for placing the Accent.

- 1. In words of two syllables, if the first syllable terminate in a consonant without a vowel, this syllable ble has the accent; as, like ram-sho, evening; like garmo, bone.
- 2. If on the contrary the final letter of the word be without a vowel, then the accent is put on the second syllable; as, i-léd, he begat; po-ked, commanding. If each syllable be formed in that manner, still the second is affected with the accent;

- as, 2 pek-dáth, she has visited. The accent is also placed on the second syllable in nouns ending in o; as, as à à à à.
- 3. In words consisting of more than two syllables, the accent is generally placed on the penultimate; as, lais po-rach-to, bird; laso me-khúl-to, meat; mart-yo-nu-tho, admonition.

13. The Method of expressing Numbers.

It is found in Syriac writings that numerals are more frequently expressed by the letters of the alphabet than by numeral nouns.* In Section 1 the numerical power of each letter is given. It will be seen by reference to the table exhibiting the forms &c. of the letters, that the first nine numerals are represented by the first nine letters, and the decads, i. e. the numerals 10, 20, 30, &c. to 90, by the nine following letters, viz. those from - to 3. The remaining four letters ..., i, ..., 2, represent respectively 100, 200, 300, and 400. The Hebrews use the final letters for expressing 500, 600, &c., to The Syrians, however, employ a different notation. They put a point over a letter representing a decad, viz. 10, 20, &c, and the effect of this point is to multiply the numerical power of the letter over

^{*} I have been informed by Dr. W. Wright, that in the MSS. of the British Museum, down to about the ninth or tenth century, a series of arithmetical figures is employed to express the numerals.

which it is placed by 10. Hence $\vec{i} = 100$, $\vec{j} = 200$, &c. Hence also $\vec{j} = 500$, $\vec{m} = 600$, $\vec{m} = 700$, $\vec{m} = 800$ and $\vec{j} = 900$.

In order to express thousands, an oblique line is drawn under a letter from the left hand towards the right. The number of units, which the letter denotes, will, with the said line under this letter, show the number of thousands: we have, therefore, 1 - 1000, = 2000, = 3000, = 8000, ... = 9000, ...

Letters having a horizontal line subjoined, represent tens of thousands, i.e. this line denotes that the number indicated by this letter is to be multiplied by 10,000. Hence,

 $\begin{array}{lll}
1 = 10,000, & = 20,000, & & & & & \\
200,000, & & = 200,000, & & & & \\
200,000, & & & = 300,000, & & & \\
3 = 900,000, & & = 1,000,000, & & & \\
3 = 900,000, & & & = 1,000,000, & & & \\
3 = 2,000,000, & & & & & \\
3 = 2,000,000, & & & & & \\
3 = 2,000,000, & & & & & \\
3 = 2,000,000, & & & & & \\
3 = 2,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3 = 3,000,000, & & & \\
3$

Fractions are represented by means of an oblique line drawn from the left hand to the right, placed over a letter; as, $\frac{1}{2} = \frac{1}{2}$, $\frac{1}{2} = \frac{1}$

In the composition of units, decads, hundreds, &c., the letter which exhibits the greater number is placed on the right hand; that which stands for the less number on the left; as, = 43, = 351, = 1866. Both in MSS. and printed books it is usual to draw a horizontal line over letters expressing a numeral, to indicate the purpose for which the said letters are employed; as, = 72.

14. Reading Exercises. MATTH VI. 9-13.

اِحْهِ بِدُتَهُمُ لِهُ مِنْهِ مَعُدِ اِلْمَا فَكَدُهُ كُو لَهُ وَا وَدُنُهِ الْمُعْنِمِ مَعُدِ اللهِ اللهُ اللهِ اللهُ اللهِ اللهُ اللهُ اللهِ اللهِ اللهُ اللهِ اللهِ

The same in English Characters.

15. The simplest forms of nouns are those which consist only of the letters composing the root; as, sing, sucrifice. Such words are evidently in their primitive state.

These letters are probably abbreviations of words, and the signification of them qualifies that of the primitive word to which they are united.

Nouns having (أ) with the first radical, and (أ) with the second, are generally nouns signifying persons; as, اثنتُ a friend; whilst those having (أ) with the first radical, or ending in o, المناب strength.

Two words are sometimes compounded in sense; as, the 2; a word. Sometimes the two words are joined together; as, the least number of compound words occurring in Scripture may be found by referring to the Lexicons

of Schaaf and Castell under the words الماء, باء, مداء , مداء , مداء , مداء , مداء , هداء ,

16. Gender.

There are two genders, the masculine and feminine.

Of the masculine are,

- (1) The names of men and their offices; as,
- (2) Names of nations, rivers, and mountains; as, مِذَذِبُ Canaan, مِذَذِبُ Jordan.

Of the feminine gender are the names of women, the offices of women, islands, cities, and names of the double members of the human body.

The feminine gender of nouns is also known by the termination. These terminations are 1, 0, ... 2; as, 1 praise, 2 goodness, 202 confession, this a part. The nouns not ending with any of the foregoing letters, and not included in the preceding paragraph, are generally masculine.

Nouns consisting of two syllables, and beginning with a >>, if the first of these syllables have ', then in becoming feminine they add another ' to the letter which is next but one before ', as, اعترا معترا المعترا المعتر

Nouns which begin and end with Zekofo, and which consist of four letters, when they become femi-

nine, take Revotso upon the second letter, provided that one of the letters is not a guttural; as, i, i a father, fem. |2, i a mother. But if the noun contain a guttural letter, then the Revotso is changed into Pethocho; as, i fem. |i an acquaintance, i fem. |i assing.

Nouns which begin with Zekofo and terminate in أبر when they become feminine take Chevotso upon the second letter; as, المُعَمَّ fem. المُعَمَّ worthy, أبر fem. المُعَمَّ flowing.

But if they begin with Pethocho and end in L, when they become feminine they take Chevotso upon the second letter and cast away the Pethocho from the first; as, L= fem. | L= elected.

Nouns ending with Zekofo only, and having Pethocho on the first letter, when they become feminine change the Pethocho from the first letter to the second; as, ازعت fem. الأزعت companion. المنافذة king, fem المنافذة queen, and a few others do not observe this rule.

The feminine gender of adjectives is derived from the masculine by the addition of i to the end of the latter; thus, in good from in masc. Those ending in a quiescent convert it into moveable; as, if pure, fem. in

Some adjectives insert Yud immediately before the fem. termination; as, is small, fem. Liscip. Adjectives in

seem always to insert ن as, الْمِيْنَ spiritual, from المُعْدَنُ masc. مِعْدُكُمْ obedient, fem. مِعْدُكُمْدُنُمْ

There are masc. nouns of the def. state in |2, when Z is one of the radical letters of the noun; as, |\(\lambda \in \beta \cdot bow, \lambda \in \right] \) olive. (In the other hand there are some nouns with a masc. ending in the def. state, which are either fem., or common; as, \(\lambda \cdot \cdot \sigma \lambda \cdot \sigma \lambda \cdot \sigma \lambda \cdot \sigma \lambda \cdot \sigma \sigma \lambda \cdot \sigma \sigma \lambda \cdot \sigma \sigma

Some nouns are used in both genders, and are therefore termed common; such as, line tongue, line cloud, large sun, &c.

The rules for distinguishing gender are for the most part the same as in Hebrew. The same words, when occurring in both, have the same gender; as, IDD and for book, Dr and poday, are mase; YIN and Sil earth. UDJ and Low soul, are fem.

Words derived from the Greek do not observe the foregoing rules, but generally retain their own gender, as, \(\frac{1}{2}\). διαθήκη, fem.

17. Number.

There are two numbers, the singular and the plural.* Masculine nouns make the plural number, 1st. by adding to the singular; as, iman, ima

^{*} There are three examples of the dual number, viz.

Nouns of the fem. gender form the plural by changing the termination أَـ into رَّ, o and أَ into رَّ, and أَ into رَّ, as, الْمُصِينَّة similitude, رَحْنَة similitudes; مُحْنَة portion, رَحْنَة portions; حَبَّة usury, in the plural جَبَّة.

Nouns which terminate in |20, when they become plural, change into placed on the Vau; as, |200; multitude, plu. |200; multitudes. A few nouns besides the take on the second letter; as, |200, plu. |200, prayers; |20, hip, plu. |200, Others, instead of take upon the first letter; as, |200, likeness, plu. |200,

Nouns consisting of three, four, and five syllables, and terminating in الْمَدِينُ change the مِدْ into مُنْ when they become plural; as, الْمُدَانُ usury, plu. الْمُدَانُ .

Nouns which have ' on the first letter and end with Yud and Aleph with the vowel ', and which consist of four letters, in the plural transfer ' from ' the first to the second letter; as, line elect, plu.

Nouns having on the first letter and ending with \vec{l} , in the plural receive the vowel vupon the letter immediately preceding \vec{l} ; thus, \vec{l} \vec{l}

Those nouns which commence with a Mem and have reither upon the first or second radical, in the plural receiver on the letter immediately preceding Yud; as, reprobated, plu.

Feminine nouns consisting of three, four, and five letters, which end in 2 and have upon the letter before Yud, in the plural add another to the Yud; thus, laiso spiritual, plu. laiso.

There are many other changes of vowels which nouns undergo in passing from the sing, to the plu, which will be more particularly noticed in treating on the const. and def. states.

Some feminine nouns terminating in |2, insert in the plu. between the root and termination; as, |λωοὶ place, plu. |λωοὶ; |ἐἰοὰὶ small, plu. |λῶοὶ. Other nouns in the masc. or fem. gender insert o; as, |λῶο a companion, plu. |ἐῶῦὶ; |λῶοὶ a nation, plu. |ἐῶοὶ. There are nouns in which σ is inserted in like manner; as, Ιῶὶ mother, plu. |ἐσῶὶ; [λῶὸὶ maid servant, plu.]ἐσῶὶ.

Many Syriac nouns have the masculine form in the sing, and the fem. in the plural; as, m physician, plu. (am; ; ;) place, plu. (am; as, throne, plu. (am; as).

Nouns compounded of two words sometimes admit a plural in the former; as, prince some of man or men; sometimes in the latter; as, prince enemics; and sometimes in both; as, prince (daughters of words), words.

Some nouns are found in the plural form only; as, heavens, life, life, water.

There are nouns, which admit in the plu. two forms; but in a different sense; as, \\[\lambda \sigma \] \\ maid, plu. \\[\lambda \sigma \sigma \]; but when \\[\lambda \sigma \] signifies a cubit, the plu. is \\[\sigma \sigma \].

There are other nouns which are very irregular; as, socination, plu. (20), land house, lind; is son, lind; land village, lind, &c. Many words of a Greek origin retain the Greek termination in the plural; as, land, mo, ml, or m, resembling the termination as of the Greek accusative plural; as, land, διαθήκας, &c.; or in a, mo, mo, συνόδους; or in man corresponding to εις; as, mannon λέξεις.

18. States of Nouns.

To the absolute and constructive states of nouns, which the Hebrews have, the Syrians add a third, the Definite, or, as it has been more generally called, the Emphatic. This is indicated by the termination, and is equivalent in general to the article before a Hebrew noun. It happens however that the primary signification of this state has been departed from in many instances, and nouns are found in the def. state

when only an indef. sense is intended to be expressed. The rules for passing from one state to another depend either upon the gender, the number, or the final letter, or on more than one of these. First for

19. Masculine Nouns.

In the singular number the absolute and constructive states are the same.

The definite state is obtained by the addition of it to the end of the absolute. Hence the definite state of masculine nouns and the absolute state of feminine nouns have the same form.

Those nouns ending in 1— in the absolute state, in the definite the 1— is changed into 1.

The constructive state, plural number, is formed by changing the termination ___ of the absolute into ___ and __ into __.

The object of the remainder of the section will be to ascertain the changes of vowels which nouns undergo in their different states of both numbers; or, which is the same thing, given the abs. state sing, num, to find the vowels and their position in the constr. and def. states for both numbers.

1st. If a word consist of three consonants with a vowel on the second consonant, which is the case with

a very large class of nouns, this form is equivalent to one of the old forms of segolate nouns in Hebrew. In Syriac these forms are, I. To the alternate form of which is to or to alt. To alt. To or to alt. Thus, we have therefore only to add the proper termination to the alternate form to obtain the def. state sing. or the abs. const. and def. states plural. Thus,

	act some	cs brurar.	Inus,	
, , ,	Singu	lar.	•	
Def.		Abs. and Const	1	
محرا		, •	morning	1
∫ , ≥ ∞		! چَ∞	book	2
خدرا		تخت	servant	3
ا تعتا		حقت	wing	4
محما		احدا	captive	5
120000		Socie	body,	6
	Plura	ıl.		
Def.	Constr.	Abs		
ļ i a•	 24	رمأَع ً	mornings	1
اِ دِّع َتُ	r¦≂w	ر أع م	books	2
جحي	خديب	چھٹے	servants	3
jara	ئىق تىچىت	د ق تق	wings	4
محمل	مُحمَّ	~ ~~	captives	5 11
12000	Joseph .	سيمعص	bodies.	6

- 1. In the foregoing examples, that which is marked (1) comprehends all those nouns having v on the second consonant, and remitting it to the first in the process of inflexion; such are body, is dust, if time, is beard.
- 2. In the second example, we have those nouns which take in the second consonant, but in inflexion it is changed to and remitted to the first. The truth is, the vowel is the proper vowel in both places, and the reason of the change is, that in such nouns the last letter is a guttural or Rish.
- 3. In the third example are included those nouns whose forms are has and has; such are his king, pin home, husband, pin anathema, was soul.
- 4. The fourth example belongs to that class of nouns whose forms are who and who.
- 6. All nouns of the forms Salo and Salo are represented by the sixth example.

be considered as belonging to the same class of nouns as The Yud has Chevotso, because this letter is never without a vowel when it begins a word. If the last consonant be a guttural or Rish, it is preceded by the vowel Pethocho instead of Revotso; as, month, heap of stones.

Such nouns as eye, so day, also correspond to the Hebrew segolate nouns. In these the vowel is changed into in the def. state sing., and all the states plu., and this new vowel makes a diphthong with o or ; thus,

	Singular.	
Def.		Abs. and Constr.
		eye.
يعمرا		yoù day.
	Plural.	
Del. ▼	Consti.	Abs.
17.7	كتيب	eyes.
اجّومٌ	۔ محّدۃ	days.

2nd. Other classes of nouns are the following.

1. Such nouns as admit no change of vowels in inflexion; thus,

	Singular.	
Def		Abs. and Constr
تِـما		evil.
	Plural.	
Def.	Constr.	Abs
تِ مِا	تمهما	رمغِمِيَ .

The vowel Zekofo is immutable, and therefore monosyllables with this vowel are represented by as, as, as, book. Nouns

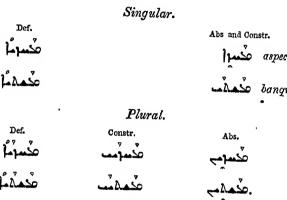

having two or more syllables, if the penultimate terminate in a consonant, or if the ultimate syllable be perfect without the terminating consonant, also belong to this class; as, where explanation with disciple. Some nouns wanting an absolute state may be referred to it; as, find the stay, his the lim, have the serpent, low death, low winter. Los conversation, for the form of the definite state remains in all the parts of their inflexion. Finally, nouns which possess either of the following forms preserve their vowels immutable, viz. who def. have. A few nouns appear to correspond with the segolate nouns in Hebrew, but which really belong to this class; as, warrase, is small, we mague.

2. Monosyllables, the vowel of which is or, and nouns of many syllables, the last of which is mutable, are exemplified in the following Table.

	Singular.	•	
Def.	-	Absented Co	11.
မို႑		Q	ywen r
دُمدُا		رْسَيْ	priest
أُعْذِا		إعذب	leemb
	Plural.		
Def	Constr.	Alm	
ائتاً	ڗؙڵٮ	ارب	species
چيوترا	مرية	جامت	priests
أعكراً	أعذت	أعذته	lande.

The noun is son, makes in the plural sons; as if it were derived from a different root. Also is peculiar in receiving the consonant of in the plural; thus, color, losson.

3. Nouns of more than one syllable, terminating in Olaph or Yud, may constitute another class. Such are,

A few nouns double the last letter in the plural; but the linea occultans is placed under the first of the two letters; thus, مختعفاً عند sea, plu. مختعفاً بيا people, is another instance.

20. States of Feminine Nouns.

In the singular number, the constructive state changes i of the absolute into 2 -; thus, i year, Ni.

Nouns which in the absolute state terminate in o or , in the constructive end in 20 or λ_2 ; as, $\hat{\epsilon}_1$ victory, constr. $\hat{\epsilon}_2$: usury, constr. $\hat{\epsilon}_2$:

Fem. nouns having a mase termination; as, wie belly, and those ending in 2 \(^2\); as, Air portion; make the abs. and constr. states the same.

The definite state of fem. nouns which have a masc. termination is the same as that of masc. nouns; as, may belly, def. in:

In the def. state the $| \hat{l} |$ of the abs. is changed into $| \hat{l} |$; as, $| \hat{l} | \hat{l} | \hat{l} |$ word, def. $| \hat{l} | \hat{l} | \hat{l} |$.

If the word in the abs. state terminate in 12, the Yud becomes quiescent in the def. state, and the preceding consonant takes *; if the termination in the abs. be |3, then Vau becomes quiescent in in the def. Ex. 4, 5.

Nouns ending in \circ $\stackrel{\cdot}{}$ or $\stackrel{\cdot}{}$ make the def. by the addition of |2|; those ending in \angle add only |. in the def. Ex. 6, 7, 8, 9.

To avoid the concourse of several consonants without a vowel, or, which is the same thing, to facilitate the pronunciation, a vowel, namely or; is placed with the second or third radical; as, is widow, def. 1225.

Nouns ending in in the abs. masc., in the def. state fem. assume = under the Nun, which is followed by ia; as, in the def. fem. ia; as, comforter. See p. 40.

In the plural number the constr. state is derived

from the abs. by changing the final into 2, and the def. is derived from the abs. by changing into 12.

The Examples in the following Table will further illustrate what has been here said on the states of fem. nouns.

		Singular.	
Def.	Constr.	Abs.	
حدومك	حةەكم	μολο virgin	1
المكرية	2024	h chariot	2

ادُمْنَکُهُ	كُوْنَكُ	رمْنَّکُ	portions	()

In No. 1, we have an example of those nouns ending in which undergo no change of vowels in their different states; such are, is an egg, is circumcision.

- 2. Nouns which assume an additional vowel in the def. state singular.
- 3. This example represents nouns in which the vowel on the 1st rad. of the abs. sing. is removed to the 2nd. rad. in the def. They partake of the character of segulate nouns in Hebrew.
- 4, 5. In these examples we have nouns whose terminations are 1 and 10. A few nouns belonging to the latter east away the vowel of the 1st. rad. in the def. state sing.; as, 1000 blow, def. 12000.
- 6. This is an example of nouns ending in ô, which preserve their vowels unchanged, and in which no new vowel is introduced; as, oil liberty, and equality, and fraternity.
- 7. Nouns represented by are such as receive another vowel in the plu. viz. v or , which is placed on the 2nd. rad.; as, and prophecy, and military service.

- 8. This is the model of nouns the abs. state of which ends in In the plural Yud quiescent is changed into Yud moveable.
- 9. In the nouns represented by Aio we have in the plural z taken away and o moveable placed before the plural termination; such are, Aio sacrifice, Ain ablution.

In some instances the penultimate letter is written twice in the plural; as, is bride, plu.

There are some anomalies; as, final praise, final in the def.; fin sister, plu. def. final.

Jesus departed.

ار المار المار words of God; or, امثان words of God.

to the king, wai to Jesus, is to the blind man.

God loved the world. Sometimes we see Λ in imitation of the Hebrew אוֹר; e. g. Gen. i. 1.

וֹבְאַבׁ of O! woman. See also Acts i. 1.

lass with the king, &c.

If one of the letters • • • be prefixed to a noun, the first radical of which is i or •, then the prefix receives the vowel which the i or • previously had; as, i a brother, i, i, i, a son, i, • • •, i, • • •.

When one of these letters is prefixed to a word consisting of three letters, and especially to those which end in two Olaphs, it takes the vowel; as, with a hundred, it is and a hundred. But this rule is not always observed in words, which are not composed of three letters and do not terminate in two Olaphs.

Again, should two or more of the letters \circ : \circ be placed before any word, if the first of these prefixes be without a vowel the second will have one; also, the third will be without, and the fourth with a vowel, as we see, for instance, in the noun $|\mathring{\Delta} \hat{\Sigma} \alpha|$ word; for we say $|\mathring{\Delta} \hat{\Sigma} \hat{\Sigma}|$, $|\mathring{\Delta} \hat{\Sigma} \hat{\Sigma}|$, and $|\mathring{\Delta} \hat{\Sigma} \hat{\Sigma}|$.

Adjectives.

22. The Syriac adjectives are few, but this defect is supplied by other words, which when placed in certain positions obtain the use and signification of adjectives. For instance, the state of construction will supply the force of an adjective; as, lie and city of holiness, i.e. holy city, Matth. iv. 5. Also a sub-

stantive put absolutely with ? prefixed; as, a spiritual body, 1 Cor. a spiritual body, 1 Cor. xv. 44. Also in other ways; as, the fire, bi? bi? which is not extinguished, i.e. inextinguishable; which is not extinguished, i.e. inextinguished, i

Adjectives are distinguished by gender, number and states, which are the same as in substantives. It is only necessary to notice that in adjectives the masc. def., and the fem. abs. have the same form; but they are easily known the one from the other by the substantive or the verb with which they are connected.

The degrees of comparison are not to be found in a change of the adjective, but are merely marked by certain particles and connections.

The comparative is expressed by the positive construed with so either preceding or following it; as, on it is there is sometimes added if well, very, or is much, very; as, on it is in a two-edged sword, lit. very much sharper, &c. Blessed is he who gives in the comparative is sometimes marked by the sense of the passage only; as, in local the claer shall be servant to the younger.

The superlative is often formed by the duplication

of the positive; as, least; sometimes by adding the particle wery, which is equivalent to the part. The of the Hebrews; as, worst, plu.; sometimes again by much; as, lie worst, as, least honoured; or by prefixed to the plural; as, least of the among kings, i.e. the least of kings; or as, least of the Apostles, literally, least of those who (are) the Apostles; or it is expressed in the following manner; whosoever therefore shall break one lie is a of these least commandments, Matth. v. 19. See also two other places in this verse.

Many adjectives are formed by the addition of to the words from which they are derived; thus, المعدد corporeal, المعدد mountainous, المعدد primitive. So also adjectives having a Greek origin; as, المعدد barbarous, المعدد المع

23. Numerals.

Numerals are either cardinal (احقة), or ordinal (اعقاد).

Ordinal.		Cardinal.		
Fem.	Mas.	Fem.	Mas.	
صِّ مُحْدِدُا	first مَعِكُمُ إ	Constr.		
-	second	کزنگے کے کرنگ	ند کرند درند کرند کرند	
-	L'ALL third	A\$2	ILL three	
_	fourth وحدث	آذ ٽ	أنحكاً four	
_	fifth	ممضم	five	
_	LA sixth	A. 1	As or the six	
_	seventh	مد"	seven	
-	ونيا عيد eighth	ليثد	eight ککٹیا	
المُحْمِدُ	inth	× Z	nine	
حسِنُوهُ أ	tenth	•m≥]im≤ ten	

From ten to twenty the numbers one, two, &c. are prefixed to ten, in the following manner:

Ca	rdinal.	
Fem.	Masc.	
ٳ <u>؞</u> ٚٙڛػ۪ڹٚٚٮ	· im>im>im>im	eleven
<u>انسے ک</u> نے کے	2 فحصه	twelv e

المُجْمِةِ لَمُ		٤٤٨٤٤	thirteenth.
&c.		&c.	

The law for deriving them from the cardinal is sufficiently obvious.

Cardinal numbers from three are for the most part joined to the thing numbered by Apposition either in the absolute state; as, معنا أَوْمَا أَمْ اللَّهُ اللَّهُ عَلَيْهِ اللَّهُ الل

These numbers are frequently found to occupy the place of ordinals. In Luke i. 59, we have Lie's the day which (is) eight, i. e. the eighth day, the sixth hour. (See Syntax.)

Denary numbers from 20 to 90 are expressed in the plural, and are of the common gender; thus, with twenty, which fifty, when sixty, we seventy, seventy, and or will eighty, which sixty, with sixty, which sixty is seventy, which sixty is seventy.

The ordinals are derived from these by adding the termination for the masculine, and in for the feminine; as, masc. fem. in twentieth.

The remaining numerals are, is a hundred, who two hundred, is it three hundred, &c., which are formed by prefixing the less number of the feminine gender before is. Plu. 12013 hundreds. Also, a, or a thousand, def. 123, plu. 23, or 123; ten thousand, plu. 23.

Twice, thrice, &c. are expressed by cardinals, with the noun interpolation, after them; as, in once, lit. one time; 232 in once, lit. once time; 232 i

Words denoting a part of the whole are, الْكُوكُ a third part, فَحُدُّ a fourth part, فَحُدُّ a tenth, &c.

Multiples, as double, treble, &c. are expressed by ,, and a cardinal number following with _ prefixed, or sometimes without it; as, seven fold, lit. one in or into seven, _ double.

PRONOUNS.

24. Pronouns are sometimes *separable*, i. e. they consist of words, and sometimes *inseparable*, i. e. they are expressed by certain particles called *affixes* placed at the end of nouns, verbs, or other particles. The following is a table of the personal pronouns.

pronouns; as, on that man, on that woman. They are not often employed as substantive verbs; although they are occasionally so used in conjunction with particles. (See 1 Cor. iv. 7, and elsewhere.) They are met with to give emphasis or confirmation to a sentence. Hoffman in his Grammar cites an instance from Ephraim Syrus, T. I. p. 122 p, and he

adds: ubi plura hujus generis invenies. Amira states in his Grammar that the Maronites translate on and on by ipse, ipsa, and on and on by ille, illa.

and and are used indifferently in the oldest MSS. In later ones we find and occasionally in the latest, only in the latest, only in the latest.

رِمَا and عا are for the most part found after a transitive verb; as, رمَا عَكُن رمْت they have filled them, John ii. 9.

25. The Demonstrative Pronouns.

These become reflexive by being joined to the personal pronouns; as, há có he himself, há sá she herself.

In the Theophania of Eusebius, we have your and your for your and your.

ມັກ and ໂເກ coalesce with on and an, and then we have the following compounds, and this is, masc. ໂເກ this is, fem.

μό with the σ expunged seems to be used as a

suffix to the noun so : thus, box this day, or to-day. See Mark xiv. 30, and elsewhere.

رَّم of which هُمْ may be regarded as the definite form is occasionally found; as, المَّهُ عَبُّ رُمْ, but this suspicion. Ephraim T. I. p. 370. In Assem. Biblioth. Orient. T. III. p. 75, line 4, رَمْ is found between the substantive and the adjective. Again, the fem. عَمْ is also met with; as in Ephraim T. III. p. 590, عَمْتُ in this.

The demonstrative pronouns in the plural number, viz. (ais and ais, etymologists derive from his this. These pronouns are also found performing the office of personal pronouns. (See p. 60.)

26. The Relative and Interrogative Pronouns.

The *relative* is of both genders and numbers, and is prefixed to words. It is the same as the Æthiopic א, which in Hebrew has the same use and signification as אָשׁר or שָּׁיֵב.

In the Jerusalem lectionary is found as a relative according to the Chaldee.

The interrogatives are,

of the person who?

of the thing اَكْمَ , حِثْ , رَعْثُ , رَعْثُ , رَعْثُ , رَعْثُ , سُلُط ؟

is of both genders and numbers. and is compounded of and on; as, and on and on who hath opened his eyes? lit. who is he, who hath opened for him his eyes? We have also one what is it? for on his.

Interrogatives of both person and thing are had mase. find fem. who, which, what? of the sing. numb. and and who, which, what? of the plural.

The particle is not unfrequently found with an interrogative pronoun. See Matth. xviii. 1.; Luke i. 66; John vii. 35, &c. Schaaf says, "particulæ hujus usus frequens est in interrogationibus, et valet id quod apud Græcos äpa."

امناً أَمْاً have sometimes the force of the Latin qualis, what sort &c.; as, اَمْا اللّٰهُ with what body? i. e. with what sort of body? 1 Cor. xy. 35.

compounded of = and $\stackrel{\frown}{=}$ expresses how great? or how many? equivalent to the Latin quantus? or quot? See Matth. vi. 23; xv. 34, &c.

When \dot{p} is used with these interrogatives, they become relatives; as, $\mathring{p}_{\dot{p}}$ $\overset{\circ}{\mu}_{\dot{p}}$ he who entereth not, John x. 1.

Care must be taken not to confound with the preposition with a point above the so, and the latter so, with a point below it.

The Greek particle $\stackrel{\checkmark}{\smile}$, $\mu \acute{e}\nu$ is also written $\stackrel{\checkmark}{\smile}$. The context of course shows whether this or the pronoun is intended.

27. The following Table exhibits what are called pronominal affixes, which are added to the end of nouns. They are certain abbreviated terminations or inseparable particles, and have the signification of possessive nouns.

Plural.			Singular.		
7	com gender.	my	44	com. gender.	my
7	masc.	thy	y	masc.	thy
سعم ₹	fem.	thy	_حب	fem.	thy
*070-7	masc.	his	۵_	masc.	his
014	fem.	her	ஏ _ீ	fem.	her
←	com.	our	4	com.	our
رمغم	masc.	your	ίσο	masc.	your
رغہ ک	fem.	your	حئي	fem.	your
رەشم⁻	masc.	their	(ဝတ်	masc.	their
~	fem.	their	الامح	fem.	their.

28. There are separate possessive pronouns. They are expressed by the letters compounded of which, the older form of . Chald. 7, and to. These are put before the affixes; thus, wy, wy, thy, masc; thy, fem.; ohis, ohi

Distributive pronouns are expressed by انما, منا and the preposition عن sometimes the substantive

^{*} In the Jerusalem Lectionary we find LaO used for the affix of the 3rd pers. sing. masc. to a plu. noun.

is taken away and the distributive pronoun is indicated by من only (perhaps من was originally a noun denoting a part); thus, وثنت ونعدة some of them, or وثنت some of them; also by من من من or من سلمة whosoever, من من من whatsoever. The latter pronoun is composed of من all, and من something, or any thing.

Other pronouns are formed by adding the affixes to the nouns is soul or person, and is substance or person; as, is save thyself; and he went, hanged himself; and he went, hanged himself; as in himself. See also John vi. 53.

29. Nouns with Iffixes.

We come now to nouns with affixes. The vowel changes of nouns receiving the affixes in Hebrew are many and complicated; but in Syriac are few and simple. The following is an example of a masculine noun, which is first put in the definite state and then takes the affixes in the place of the termination].

Singular.

Def. State.	اعْكف	king
1st. pers. sing. com.	مُّكُحت	my king
2nd masc.	مُّكِدُر	thy

2nd.		fem.	مُخْدُدِد	
3rd.		masc.	مُحْكِيَّه	
3rd.		fem.	مُحكِدُه	her
1st.	pers. plu.	com.	مِّکحِّہ	our
2nd.	•••••	masc.	مُحْدِدُه	
2nd.	*********	fem.	مُكددم	your
3rd.		masc.	مُحَكَنَّهُ	their
3rd.		fem.	حميعكك	their

Plural.

1st. pers. sing.	com.	<i>ڡؙٚڬڎ</i> ۫ڡ	
2nd.	masc.	مُخذَّدُمر	
2nd	fem.	<u>مُک</u> دّده	thy
3rd	masc.	<i>مَکْدُ</i> وہِم	his .
3rd	fem.	مکخچہہ	her
1st. pers. plu.	com.	<i>خَن</i> ادُم	our
2nd	masc.	رمثُدُدُه	your
2nd	fem.	<u> </u>	your
3rd	masc.	مُختَحْثُهُ	their
3rd	fem.	مُخدّدمهم	their

- 1. The word wise is pronounced Malk, the being otiose.
- 2. Nouns in the singular number the definite state of which terminates in \(\int_{\text{,}}\) form the affix of the first person singular in \(\text{,}\), and the second and third persons plural in \(\text{,}\), \(\text{,}\),
- 3. Such nouns as terminate in عمل and the letter immediately before Yud having a vowel, when they take the affixes the الله is removed, another is added in the plural, and the first Yud changes its vowel to Pethocho; as, احتما an architect, plu. كثما. With affixes we have
- 4. Those nouns having the abs. state like and, and the definite like har, retain the with the affixes of the first person sing. and second and third persons plu.; as, and my priest. Again, those in the abs. state having the vowel on the last syllable, and any other vowel on the preceding syllable, the is preserved with the affixes of the above-mentioned persons; as, altar, altar, we my altar, your altar, &c.
- 5. There are some nouns, namely, monosyllables, which have the vowel in the abs. state, and which lose it in the definite. Such nouns preserve the

with the affixes of the above-mentioned persons; as, منظ def. بعد blood, بعد my blood.

The nouns like $\hat{\mu}$ speech, and $\hat{\mu}$ shade, which have the linea occultans under the first Lomad, when they take the affixes, the linea occultans is removed, and the Lomad receives ; as, $\hat{\omega}$, &c.

Lord, is not found with any pronominal affix. The reason is, that under such circumstance, the noun اَثُنَّ is used in its place; thus, عُنْنِ my Lord, مَنْنِهُ thy Lord, مَنْنِهُ his Lord, &c.

Three nouns, namely, father, father, brother, father-in-law, take the affixes in an irregular manner.

1st. pers. sing.	com.	أحب	my father
2nd	masc.	ٲڎۅڔ	thy
2nd	fem.	ٱڎٛ؞ٮ	thy
3rd	masc.	ارتومت	his
3rd	fem.	أدون	her
1st. pers. plu.	com.	رْحُهُ	our
2nd	masc.	أحوثو	your
2nd	fem.	أثوي	your
3rd	masc.	ردهم	their
3rd		•	their

The other two nouns take the affixes in the same way,

except that in makes my father-in-law. See obs. 4, p. 46.

بَّ , اَ , son, has بَ my son, رعْبَ your son, رمْبَ their son, &c.

30. In feminine nouns the same affixes are used for both numbers; namely, those which are annexed to the singular number of masculine nouns. They are put to the end of feminine nouns in the constructive state in the first person singular, and in the second and third persons plural, and at the end of their definite state in the other parts, the termination i having been taken away. The reason of this difference is, that as to the pronominal affixes mentioned, if they were placed to the definite state of the noun, there would be a concourse of several consonants without a vowel.

The following is an example of feminine nouns with affixes.

Singular.

abs. lair family,	const.	مَا جُهُ	def.	١٨٥٠	▽	
1st. pers. sing.	com.		<u> </u>	من د	my	family
2nd	masc.		ء ا بر	م;داً	thy	
2nd	fem.		حب	<u>~</u> +•	thy	*****
3rd	masc.		6	من در	his	•••••

3rd	fem.	ത∆ാ;∙		
1st. pers. plu.	com.	رمٌع <u>; ؞</u>		
2nd	masc.	(ο•λΣ; <u>«</u>	your	
2nd	fem.	حتْ γيٍ؛ حِيْ	your	
3rd	masc.	ڔ٥ۺؙڴؾؙؠ۫ڂ	their	•••••
31d	fem.	حَمْ بِي بُحِ	their	•••••
		Plural.		
1st pers. sing.	com	مَوْرُكُمْ عَالَمُ عَالَمُ عَالَمُ عَالَمُ عَالَمُ عَالَمُ عَلَيْكُمْ عَالَمُ عَالَمُ عَالَمُ عَالَمُ عَالَمُ ع	my	familics
2nd	masc.	مُ ۥ دُدُهُ ر	thy	•••••

2nd	fem.	مِبْ رِيرَ مَ	your	
3rd		رِثُمَكُ ﴿ يُحْدِدُ	their	•••••

via with the affix - transfers the from the first to the following letter; thus, -2i - my daughter; but it remains in the others; as, -2i - thy daughter, -2i - your daughter.

ſem.

3rd,

31 Numerals and Particles with affixes.

Numerals receive the affixes of masculine nouns in the plural number; thus, voi these two, masc., voi these two, fem., voi Lithese three, masc., voi Lithese four, voi Lithese five, voi Lithese six, voi Lithese seven, voi Lithese eight, voi Lithese nine, voi Lithese ten.

When the singular affixes are annexed, they have the power of possessive pronouns, and contain therefore another signification. For example, signification. For example, signification then, ten, their ten; and we find very frequently in the New Testament significant twelve, speaking of the twelve disciples of Christ.

A great number of particles take the affixes; as, in in in me, in thee; \(\) to, (مه که to you; که from, میک from him, میک from us; نامت after, رمه کاست after them, &c. Some particles take the affixes of masc. nouns plu.; as, میک before me, میک before me, میک for, instead of, نامی besides, near, and others.

32. In Syriac, as in Hebrew, the root of the verb is the 3rd. pers. sing. numb. masculine gender of the first conjugation. Most of the roots are triliteral, a few are quadriliteral. The triliteral roots have a vowel under the second letter, and make only one syllable.

The different forms of the verb, which express various modifications of the original sense, are usually called *conjugations*. They amount to eight, of which four have an active, and four a passive, and sometimes a reciprocal signification. They derive their names from the verb , and are contained in the following table, from which the characteristic of each conjugation may be observed.

	Act.			Pass.	
1	Peal	ودِّي	2	$\it Ethpeel$	<i>ررځ</i> ≂۲]
3	Pael	فُدِين	4	$\it Eth paal$	الكَمْكِا
5	Aphel	أعي	6	$\it Eth taphal$	ٳڮڬٞڡۮٞڒٳ
7	Shaphel	<u> </u>	8	· Eshtaphal	إملاًحكُ

The Peal conjugation is the same as the Kal of the Hebrews; that is, it expresses the verb in its simplest form and meaning.

All the passive conjugations are formed by prefixing 2 to the corresponding active conjugation. The of the Aphel is changed into 2 in its passive, and the of Shaphel is transposed with 2 in the Eshtaphel.

The Ethpeel is, 1st, the passive of the Peal conjugation; as, Add he was slain. 2nd, It is reflexive; as, Add exalteth itself. (2 Cor. x. 5.) 3rd, In intransitive verbs, the Ethpeel has sometimes the same signification as Peal, e.g. ha and add, as may be seen in Schaaf's Lexicon under ha. 4th, It is, according to Hoffman (Gram. p. 178), in intransitive and obsolete verbs, sometimes the pass. of Aphel; as, he was commended from he commended.*

Pael is the Piel of the Hebrew; when the signification of the Peal conjugation is intransitive, the Pael makes it transitive; as, it was just or fitting, Pael in the justified: sometimes it expresses the Peal sense with greater energy; as, he asked, Pa. he asked often or diligently. This conjugation has a causative sense in some verbs; as, in he bought, in he caused to buy, i.e. he sold. To the Pael is sometimes assigned the sense of commanding, permitting and declaring what is expressed by the Peal.

Ethpaal is the passive of the preceding conjugation. As the Pael, in many instances, signifies to

^{*} I think this last use of the Ethpeel rests on no certain foundation.

74 VERBS.

make or cause to do whatever is indicated by the Peal, the Ethpaal will necessarily signify to be made to do that which is denoted by the Peal; and hence it is that the Peal and Ethpaal conjugations in some verbs possess nearly the same meaning; as, he thought, he was made to think, i.e. he thought. he drew near, Ethpaal, he was made to draw near, i.e. he drew near.

Aphel corresponds to the Hiphil of the Hebrew. In sense it is usually causative of Peal; as, i.e. he remembered, Aph. i.e. he caused to be remembered, he commemorated. It is also found to possess the signification of desiring, permitting, declaring, exhibiting, &c. whatever is indicated by the Peal; as, in the permitted or granted power. In occasional instances, the Pael and Aphel are found to have the same signification: as, i.e. and i.e. The characteristic of Aphel is i prefixed to the root.

The preceding conjugations are of very frequent use, and are acknowledged by all Grammarians. Those which follow are of much rarer occurrence.

The Shaphel conjugation is generally considered to have the same signification as the Aphel; it is formed by prefixing to the root, and like the Pael and Aphel takes under the second radical instead of. By many persons this conjugation has been referred to quadriliteral verbs; but it is found so frequently—much more so than the Ethtaphal—that Michaelis and others have made it a separate conjugation of triliterals. Examples are, the made or caused to serve, the inflamed, the made perfect, he consummated, the promised, the announced.

Eshtaphal is the passive of the preceding conjugation, and is formed from it by prefixing 21, transposing the 2 with the ..., and changing " under the second radical into".

The Eshtaphal conjugation agrees in form with the tenth conjugation of Arabic verbs.

If the first radical of a verb be 1, $-\infty$, 3, $-\infty$, it is transposed with 2 of the particle 2] in the Ethpeel and Ethpaal conjugations; as, $-\infty$ he was left, instead of $-\infty$ he was lifted up, instead of $-\infty$ he can lifted up, instead of $-\infty$ he can after 3 into $-\omega$; as, $-\infty$ he was conquered, $-\infty$ he was crucified.

Verbs are either regular or irregular. The former class includes all those verbs which preserve their radicals unchanged throughout all their inflexions,

the latter those which lose or undergo a change of one or more radicals.

There are two tenses, the præterite and future. Their forms are \(\) and \(\) and \(\), and these forms determine the past and future times more accurately than they do in Hebrew. The present tense may be expressed by the active participle with the aid of the personal pronouns. By means also of the auxiliary verb two other tenses are defined; namely, the imperfect and pluperfect, of which some account will be afterwards given.

Sciadrensis in his Gram. p. محكية writes on the tenses as follows; كَاكُمُ الْ اللهِ مُعِكُمُ اللهِ مُعِكُمُ اللهِ مُعَامِدًا مُعَامِعًا مُعَامِدًا مُعَامِعًا مُعَامِعًا مُعَامِعًا مُعَامِعًا مُعِمِعًا مُعَامِعًا مُعِمِعًا مُعَامِعًا مُعْمِعًا مُعَامِعًا مُعَامِع بَدُمْ اِحْدَا which we number in the first mood; namely, the præterite, the present and the future. By the present tense he means the active participle with a personal pronoun, and there is no doubt that this combination is so often used for the purpose of representing a verb in the present tense, not only in the versions of the Scriptures, but also in Syriac writings of a later date, that a grammarian may with propriety, as Sciadrensis has done, give to this construction the name of a present tense, ارْحَامْ In this respect the Syriac language is much more perfect than any of the others which belong to the Shemitic class. In Arabic the tense which the grammarians designate مَضَارع resembling, viz. is very uncertain as to the time it is intended to mark. Sometimes, when accompanied by certain particles, such as it expresses the future; at other times when it is سف سو س

preceded by it has the force of the present; but in numerous instances the context alone can determine the tense which this form of the verb is designed to indicate. So likewise in Æthiopic there is so much indefiniteness on this point, that Ludolph, in his Æthiopic Grammar, calls **RTTC** tempus contingens, which he translates facit or faciet, p, 43; and in p. 37 he instructs us in this tense as follows: "Contingens tam Præsens, quam Futurum Indicativi repræsentat."

Concerning the expression of the present tense, Hoffman says, in his Gram. p. 335, plerumque in hunc finem part. usurpatur."

The different numbers, persons and genders are formed by prefixes and affixes joined to the root of the verb, as in the Hebrew.

The imperative form is used in an affirmative sense. A negation or prohibition is expressed by the future tense and the particle $\mathring{\mu}$ not, placed before it.

The infinitive is in its nature an abstract noun, and as such receives the pronominal affixes. It has an active, neuter, or passive sense; and when added to the verb will give intensity to the signification.

33. Before we proceed to give the tables of the different classes of verbs, it is desirable to present the student with the tenses, &c. of the substantive verb loom he was, and of Al is, which are peculiar in their forms, and because the former is much used in the general conjugations.

78 VERBS.

2	حتآ حهما	ye are	fem.
3	رميي حتاي	they are	masc
3	جيمْ جُن٥مْ	they are	fem.

Participle.

		Singular.	
	أأمو	being or is	masc.
	ြို့တ်	being or is	fem.
		Plural.	
	حمَّي	being or are	masc.
ن	شُوتُ	being or are	fem.

The personal pronouns are frequently used in the place of the substantive verb after a participle, by which means the present tense of verbs may be expressed, as will be afterwards seen. We have also the personal pronoun in such an instance; as, on it he is good. In these cases, (i) and if are employed in preference to (air and instance).

34. We come next to A is, which is the same as the Hebrew . It takes the affixes in the following manner.

Por ess.			Smealar,		Genter
1		ve are	أسائمه	I am	com.
3	وعماسا	ye are	إمامو	thou art	masa.
2	[منكمتم	gr are	متمئماً	thou art	fem.
3	(= 22-2-2]	they are	أحتادته	he is	ma «e,
3	إملامتهم	they are	خمكم	che is	fem.

If to hel with its affixes be joined the verb less, the imperfect tense will be formed; thus, here well thou was!, less especial he was.

The verb L_{-} signifies to have, when it is followed by Lomad with the pronominal affixes; as, L_{-} L_{-} there is for me, i.e. I have.

The negative form is $k \leq 1$, a contraction of β and $k \leq 1$; when it is joined with the pronominal affixes

we obtain the following, \(\simeq \subseteq \simeq \text{there is not for} \) me, i.e. I have not, I have not, and so on for the others. Or by annexing the affixes to the verb we have, I am not thou art not, the are not, wooded he is not, dieted she is not, &c.

35. We will now give a paradigm of %40 in all its conjugations, &c., as an example of the inflexion of regular verbs in general.

36. Observations on Regular Verbs.

The Proterite.

The first letter of the root is generally without a vowel, the second has for the most part, but sometimes it has, especially in intransitive verbs and verbs denoting the affections, qualities, or sensations of the mind; as, he affections, qualities, or sensations of the mind; as, he ceased, in he was ashamed, he lay down, he slept, he he trembled, he lay down, he inhabited. Also verbs whose middle radical is Olaph; as, he asked, he was hoary. Some verbs there are which admit both and; as, he had and he has caten; but in many of these instances a difference of signification is denoted; thus, according to Castell's Lexicon by Michaelis we have he saluted, and he sought. Those also whose first radical is Yud have frequently under the second; as. he sat.

The Vau of the mase, and Yud of the fem, at the end of the third person, plural number are sometimes omitted, and the verb is written ***\(\frac{1}{2}\rho \) they slew. This is often the case in the oldest MSS. The reason is that these letters are never pronounced.

Nun paragogic is added in some instances both to the mase, and fem, genders of the third person, plural number, but more frequently to the latter; as, as, as, as, and fem.

The force of this particle is supposed to be that of giving *energy* or *certainty* to the expressions in which it is found to occur.

The first person plural has frequently غُ instead of مِدْ عُدْمُ , مِدْكُمُ , &c.

The Ethpeel of the 3rd. pers. sing. fem. in some examples terminates in Yud; as, as, and like place was not known. Bar. Heb. Chron. 86. 5. See also 135. 5; 482. 8.

A very few verbs are found to have Olaph prosthetic; as, المقت he found, ما أهدت أ he drank.

It will be observed by inspecting the Paradigm that the numbers and persons of this tense are formed by affixing a particle of one of the personal pronouns to the radical letters; thus, value for value.

The Future.

This Tense seems to be formed in the active conjugations by prefixing certain abbreviated forms of the personal pronouns to the imperative mood; thus, water for water and his; water for water and his.

In the passive conjugations the same forms are used instead of | of the particle 4|.

Verbs having " under the middle radical of the præterite, in the future take "; as, -2-1; a few also

have o; as, مَرْمَ, مَوْدَ, بَهُ. Those whose third radical is a guttural or Rish take. A few verbs submit to no rule as to the vowels which they receive; thus, هِذَا السَّانِينَ اللهُ اللهُ

The second and third persons singular feminine sometimes admit Yud otiose or paragogic at the end; thus, and and alogo.

The preformative letters are not four, as in Hebrew, namely, mas; but only three, namely, A. The third person sing, and plu, of both genders take 1, probably from Lo, or can instead of as in Hebrew.

It is certainly somewhat remarkable that the prefix for the 3rd, pers. of the fut. should be Nun, when in Heb. and also in Chald. Arab, and Æthiop, it is Yud. The deviation of the Syriac in this particular from the rest of the Shemitic languages has been a puzzle to many, and has given rise to various conjectural explanations. The one, however, in which many Grammarians have seemed inclined to repose, is this, viz. that the Nun was written for Yud by mistake. This opinion is expressed as follows by Hoffman, but in which this distinguished linguist does not at all concur, " Nun præform. 3 personæ multis suspectum fuit, quia in cognatis dialectis Yud inveniebatur, neque dubitarunt litterarum Yud et Nun, que sane sunt figura simillime, in auxilium vocare permutationem facillimam." Now this mode of accounting for Nun instead of Yud appears to me in the highest degree improbable; indeed almost absurd, when we consider that the language was written and spoken at the same time, and that

Nun is so unlike Yud in pronunciation that it is next to impossible one letter should be mistaken for the other. It is better therefore that we should rest satisfied with the fact, that the fut. form of the 3rd. pers. is \alpha \alph

An exception, however, to the use of the prefix Nun for the third pers. fut. exists in the Jerusalem Lectionary. There, the prefix is universally Yud, as in the other Shemitic dialects. But the whole Lectionary, both in its structure and words, has a very strong Chaldaic complexion, and this circumstance may account for the exceptional usage.

The verb mad receives in for through the whole of the Ethpeel conjugation, except the infin., which is regular; thus, præt. maddle, he obeyed or consented, imper. amaddle, part. maddle.

The root ma, used chiefly in the Aphel, is, in that conjugation, maj he exhorted.

Infinitive.

The Infinitive of all the conjugations has Mem præformative. The Peal is masculine. The others have the termination $\hat{\circ}$, and are feminine.

Imperative.

The observation on the vowel placed over the second radical of the future holds good in the imperative; as, established selection as selection is sleep ye, established as ye. In the Ethpeel and Ethpaal conjugations the middle radical has no vowel,

and under it is placed the *linea occultans*. This peculiarity has probably arisen from the general practice of people to utter a command in a hasty and an abrupt manner.

Nun paragogic is sometimes found with the forms of the imper. in the Peal, Pael and Aphel conjugations; as, which for a large of the conjugations is the second of the conjugations.

Participles.

The active Participle Peal has always the form specific without the Vau, which is inserted in the Hebrew participial noun Kal. This circumstance arises from Vau not being used with the vowel ", but with ". On the contrary, the passive participle has with the vowel ; as, ". The participles of all the other conjugations are derived from the practerite by prefixing Mem. This letter is very probably a particle of the pronoun ; so that ". Low is he who slayeth, i.e. one slaying. In the passive and Aphel conjugations the Olaph is omitted and its vowel taken by the Mem.

From the last remark must be exempted some verbs of the Aphel conjugation, which retain the Olaph when another letter is prefixed; as, permitting to live. This is also the case in the future.

The part. Sometimes takes the vowel on the first rad., especially in intrans. verbs; as, astonished, Luke i. 21.

Occasionally the form has an active signification; as, has a active signification; as, has a ctive signification; as a ct

The Olaph of the Aphel conjugation is changed in the Ethtaphal into 2; as, \(\sigma_1\sigma_2\sigma_2\sigma_1\sigma_1\sigma_2\sigma_2\sigma_1\sigma_1\sigma_2\

37. The gutturals produce a few anomalics, and only a few; for the Syrians have not so great a variety of vowel changes as the Hebrews. Verbs, the third radical of which is on, on, or; have in the future and imperative Peal for the most part the vowel v under the middle radical. In the other conjugations and the active participle Peal, they have v in the place of r; as, or worshipping, of glorying, he mocked, if he commemorated, in the place of right he commemorated in the place of right he commemorated in the place of right he commemorated in the place of right has a place of right he commemorated in the place of right has a pl

In the imperative of the passive conjugations of verbs, which have a guttural for the third radical, the second radical receives a vowel; as, $\frac{1}{2}$ for $\frac{1}{2}$ for $\frac{1}{2}$.

In the Jerusalem Lectionary the future and imperative Peal of verbs whose third radical is a guttural are formed after the paradigm of the regular verb; as, value, ...o. &c.

The verbs he consoled, he defiled, is he polluted, and a few others in the Pael and Ethpaal conjugations, have the same changes of the vowels as the guttural verbs are mentioned in the preceding paragraph.

38. The *Present Tense* is formed by the participles (form \(\subseteq^{\(\subsete}\)) and the personal pronouns placed after them; thus,

The third pers, plu, is generally expressed simply by the act, part, in the plural number.

The personal pronoun is often found before as well as after the participle; as, $\tilde{\mu}_{1}^{2} > \tilde{\mu}_{1}^{2} I$ go, Gen. xv. 2. Several words sometimes intervene between the first pronoun and the participle; as $\tilde{\mu}_{1}^{2} = \tilde{\mu}_{2}^{2} = \tilde{\mu}_{1}^{2} = \tilde{\mu}_{1}^{2} = \tilde{\mu}_{2}^{2} = \tilde{\mu}_{1}^{2} = \tilde{\mu}$

These auxiliary pronouns are sometimes contracted and affixed to the verb; as, AŽĄĆ, AŽĄĆ thou art slaying, second pers. sing. masc. and fem. for both genders in the first pers. plural.

The substantive verb added to the participial form with will usually express the imperfect tense; as, for he was slaying. But if this verb be added to the præterite it will usually make the pluperfect tense; as, for he had slain.

The pluperfect tense will not always be determined in this manner; for it sometimes happens that the auxiliary verb is thus found with the præterite, when the context will not permit it to signify the pluperfect tense. In such case the præterite or imperfect tense will be expressed, and which of them the context will determine.

IRREGULAR VERBS.

39. Large classes of verbs deviate from the foregoing paradigm of had, and present many irregularities in the process of conjugation. They are produced by nearly the same causes as they are in Hebrew, namely, by gutturals, which have been

already noticed; by the letters $|\circ -;$ by the first radical being Nun; or by the second and third radicals being the same. Indeed the same classes of irregular verbs exist in the Hebrew, Chaldee, Syriac, Arabic and the whole of that family of languages.

We have seen that the verb \(\sigma_0 \) is employed to designate the conjugations. The classes of irregular verbs also are usually denoted, for the sake of brevity, by one of the letters in \(\sigma_0 \); is thus, \(\sigma_0 \), \(\s

40. Verbs in or in.

- 1. In accounting for the anomalies which exist in this class, it is to be observed that Olaph or Yud beginning a word must have a vowel; as, it is to be observed that Olaph or Yud beginning a word must have a vowel; as, it is he said, is he beyot, and not is. See § 5.
- 2. In the middle of a word Olaph or Yud and the preceding letter cannot be both without vowels. This is the consequence of what is stated in (1); for in those forms where two consonants without vowels come together the Olaph or Yud being the second

would begin a syllable, and would consequently require a vowel as much as at the beginning of a word.

- 3. This vowel of the Olaph or Yud is generally remitted to the preceding letter; but when an addition is made to the end of the word, to avoid the concourse of several letters without vowels, the Olaph or Yud retains its vowel; thus, \(\frac{1}{2} \frac{1}{2} \right) he was begotten, \(\frac{1}{2} \frac{1}{2} \right] they were corroded, \(\frac{1}{2} \frac{1}{2} \right] I was begotten.

In other parts of the fut. Peal, and the infin. the initial - is changed into 1; as, i, i, i, i.

- 6. Verbs are regular in the Pael and Ethpaal conjugations, which are therefore exceptions to (5).
- 7. In the Peal conjugation the vowel of the Olaph is in the præt., and of the Yud -. In the pass. participle it is in the one case, and in the other. In

the imper. of verbs is in those cases where the second vowel is the first is ; as, so cal thou, masc.; but if the second vowel be , the first is ; as, is say thou, masc. A similar rule is observed in the future tense, namely, when the second vowel is the first is , and when the second is the first is .

- 8. The Olaph in the Ethpeel and Ethpaal conjugations is sometimes changed into 2; as, إِسْرِكُمْ from أَمْ اللهُ اللهُ
- 9. Olaph or Yud in the middle of a word rests in general in or *. The latter is sometimes changed into the former.

The verb \(\sqrt{1} \) he departed, makes its imperative mood of the Peal conjugation thus,

Similarly |2| he came, has imper, |2|, |2|, |2|, |2|, |2|.

The % of %1] when it means to go, has the linea occultans as often as it ought to have a vowel from the analogy of the regular verb, and Zain by the same rule is without one. In such eases the vowel of Lomad is remitted to Zain; as, 2511 she departed.

In the passive part. Peal the radical in some verbs receives the vowel instead of ; as, it aught, Rom. ii. 18.

Yud in the verb has no need of the vowel =; because the second radical is not pronounced, and therefore its vowel is remitted to the first. There are however forms in which the is retained without the linea occultans; as, Anal and Anal. In the imper. we have

The Yud remains in the Aphel conjugation in the verbs he ejaculated, he sucked. The verb |2| changes the final | into -; as, -\(\lambda\)| he brought.

عُمْ drops the first radical altogether in the Pael; as, عُمْ أَمْ وَمُعْمَى مُعْمَالِهِ عَلَى اللَّهُ عَلَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَّ عَلَى اللّ

רבי he was faithful, in the Aphel conjugation takes on as the characteristic, and j is changed into ב; thus, בביס he believed; so Heb; תְאָמִין, Arab. מֹנְהֹים.

Some verbs beginning with Yud reject this radical in the imperat. inf. and fut. Peal; as, which has knew, fut. with, infin. with he set, fut. with, infin. with he set, fut. with, infin. with he set, fut. with he set.

41. Verbs "2.

The anomalies belonging to this class of verbs are only few; the principal one is the rejection of Nun in certain situations, and the rule is this: whenever Nun is at the end of a syllable and without a vowel, according to the analogy of the regular verb,

In the imper. Peal the Nun is thrown away at the beginning of the word; as, con for con, con for the configuration. The reason of this elision is perhaps the difficulty of pronouncing it with rapidity in such a situation, and it has therefore been neglected in writing.

The Ethpeel, Pael and Ethpaal conjugations of these verbs are quite regular in all their forms.

Verbs of this class are not found in the Shaphel and its passive conjugation.

The vowel of the second radical in the fut, and imper. Peal observes generally the same rule as regular verbs; thus, im he cul, was he breathed, he fixed, take the vowel; but as he adhered, it flowed down, have. There are a few exceptions; as, has he descended, which takes in the fut, and imper. Zani, zan.

The rule for the removal of Nun does not apply to verbs of this class, when the second and third radicals are the same; nor when the middle radical is one of the quiescent letters; nor in some verbs whose second radical is He; as, ion, ion.

from the obsolete verb an; as, an imper. and inf. an i

Olaph, characteristic of the Aphel conjugation, is occasionally retained with the prefixes; as, $\Delta \omega / 2$ thou wilt bring down, from $\Delta \omega$.

42. Verbs or or

Verbs having Vau and those having Yud for their middle radical letter differ so little from each other in their conjugations, that they may be both comprehended in one class. These letters are sometimes placed in such situations as to lose their consonantal power, and defects in consequence arise in those forms of the verb where that power is lost.

- 1. Vau deprived of a vowel for the most part rests in the vowel. In such case whenever another vowel is required by the analogy of the regular verb, the Vau is usually changed into Yud; as yould for Noo.
- 2. Vau for the most part takes the vowel or . When therefore another vowel is required by the analogy of the regular verb, the Vau is taken away, or changed into Olaph or Yud; as, po for poo, fem. plo., plu.

3. In the Aphel conjugation the Vau is changed into Yud; the Vowel, which belongs to Vau, is also changed into and this vowel is remitted to the preceding letter; as, pagi for pagi.

There are some verbs which preserve the o in the Pael and Ethpaal conjugations; io he disturbed, io he was disturbed, he joined in matrimony.

In the part. Peal the Vau is changed into Olaph, and is pronounced Yud. When the third radical is a guttural or Rish, the vowel * is changed into *. See § 37.

Throughout the Ethpeel conjugation 2 of the syllable 2 is doubled, except in the 2nd. pers. and 3rd. pers. sing. fem. fut. This is the same as in the Chaldee, except in the latter language the duplication is made by the Dagesh forte.

The verbs of this class are not found in the Shaphel and Eshtaphal conjugations.

There are some verbs having the middle radical Vau, which are not conjugated after the paradigm; namely,

- (1) Those which have Olaph or Yud for the third radical; as, he was equal, if he was equal, if he was drunk.
 - (2) Such verbs as he desired, 10; he rejoiced, she he danced, \alphai he acted unjustly.

In some verbs a difference of signification is marked

4		موم		مخبمخبم	

the Olaph is either taken away or changed into Yud; thus, A. This arises from the circumstance that Olaph is soldom found in the middle of a word beginning a syllable, or quiescent in the middle of a syllable.

2nd. Participles form the fem. gender according to the rules given in the Chapter on Nouns; as, p. fem. L., p. fem. L. fem.

4th. The infin. is subject to the 1st rule; but in other respects it is regular.

5th. In the imper. Peal and Ethpeel sing. mase., Olaph is changed into Yud; in the former it rests in , in the latter it makes a diphthong with ; thus, and [1]. But in the other conjugations Olaph remains and rests in . In the fem. makes a diphthong with [1]. In the plural forms the third rad, is either taken away in all the conjugations; or passes into [1] quiescent; thus, [2].

In the Ethpeel import sing, mase, of his or we have

6th. In the fut, tense and participles, Olaph rests in ; but before the affixes o and = it is taken away. Before the affix Claph passes into Yud moveable; as,

In participles joined with pronouns, the third radical is changed into - quiescent, for the most part in -; as, A-, OA-.

In the plu. præt. Peal of the third person we have and for of the line. In some instances the Olaph is preserved when the affixes are annexed to them; as, solitathey loosed him. Acts xvii. 14, solitothey called him. Mark x. 49.

Some verbs in Peal change Olaph into Yud, and are declined as the præterite of the other conjugations; thus,

Singr	ular.
٠	<u>.</u>
λ-	<u> _</u>
٨٥	!^^
A-	-
Δ.	144

The verb [1] is not of the Aphel conjugation, as is manifest from the vowel being under the Olaph. It is the Peal conjugation with Olaph prosthetic.

A few verbs of this class have v in the sing. numb. masc. of the imper.; as, A drink, swear.

In the 3rd. pers. plu. præt. and 2nd. pers. plu. imper. Peal, some verbs take the paragogic forms,

45. Ferbs "....

Verbs which have the second and third radicals the same lose the middle radical in the Peal, Aphel, Ethtaphal, Shaphel and Eshtaphal conjugations. The vowel of the middle radical expunged is remitted to the first. With the exception of this defect and a peculiarity in the act. part. Peal, the whole inflexion is quite regular. The Ethpeel, Pael and Ethpaal conjugations retain both the radicals, and are in every respect regular. But for the two last conjugations the Palpel and Ethpalpal forms are most frequently used; as, the deer, which he agitated, and he magnified, " he deer, the last, " in the agitated, and so for agis."

The imper, and fut. Peal receive on the second radical the vowel or , according to the rule laid down for these forms in the reg. verbs; thus, per will spail, is he will desire.

In the act, part. Peal the middle radical is changed into Olaph, but it is pronounced as Yud; thus, whi is pronounced Rosges, § 11. When an addition is made to the end of this part, the Olaph with its vowel is usually taken away; as, whi, whi. Sometimes, however, the Olaph is retained, especially in the verb he entered; as, Sh, fem. ph., plu. mase. Als, fem. Als. The passive participle Peal is regularly formed; as, who expected to the first radical takes; as, who. Matth. xxi. 5.

Verbs which have Olaph for the second and third radicals preserve both of them in inflexion. See doubly irregular verbs.

In the part. Aphel the middle radical is sometimes retained having the linea occultans; as, علم المحالية shadowing.

The Olaph, characteristic of the Aphel conjugation, is sometimes retained with the præformatives; as, at love.

N B. The 3rd. pers. sing. fem. fut. of all the conjugations both of regular and irregular verbs, has sometimes Yud at the end; as, $\frac{1}{2}$ as well as $\frac{1}{2}$.

The Objective Affixes attached to Verbs.

46. We have already seen that different affixes are added to verbs to mark the person and number; besides these, others are frequently attached, which may be called the objective affixes; thus, is she has slain thee. If the verb be intransitive, then it must be translated with some preposition to preserve its connection with the pronoun. We will first give a Table of these Affixes.

When a Consonant precedes the Affix.

رطبة) ما (جية)	

It will not be necessary to extend the paradigm beyond the Peal conjugation, for the others are inflected like it. Whatever deviations there are will be given. Neither will it be necessary to give examples of irregular verbs, except that class of them which have Olaph for the third radical, and of which, on account of some striking peculiarities, particular notice must be taken.

The first and second persons of both numbers through both the tenses do not take the objective affixes of the same person, otherwise the signification would be reciprocal, which is usually expressed by certain conjugations.

In the priet, the third pers, plu, fem, has two forms, and مراكب and مراكب , one the simple and the other the paragogic; each of them takes the affixes. There is also a mase, paragogic form رماكب .

Verbs of the sec. pers. plu. pret. of both genders do not receive the affixes con and con; instead of them are used the separate pronouns colland coll.

The following transposition of vowels takes place in receiving the objective affixes:—

% do becomes	مي لاي
مَكْمَهُ	مکہکہ
فهكم	مة
مكيِّده , ومُكيِّده	مُكهِدَّ, رمُكهِدَ
مهجم مهجت	مُهُمِّتِ , فَلَهُ اللهُ
مــــــــــــــــــــــــــــــــــــ	مکہمت

47. Præterite.

3rd. pers. sing. fem. A has slain.

3rd. pera plu mase. ().

3rd. pers. fem. plu. Aca

Participles are seldom found with the objective affixes; when they are, the modification they undergo is the same as that for nouns.

48. Observations.

Preterite with Affices.

It will be observed from the foregoing examples, that verbs and nouns have nearly the same vowel changes; thus, So, when it takes the affixes, remits the too (see p. 119), which is similar to foregoing to the other persons of the sing, the vowel is retained on the second radical to avoid three letters coming together without a vowel. In the third person plural of both genders the * is put back on the first letter, o receives *, and of the fem. is taken away. The first and second persons plu, preserve both vowels unchanged.

Verbs having with the second rad, retain it in those places where is found in %40.

Verbs having Olaph or Yud for the first radical may be referred to Le; for whenever a is destitute of a vowel, there Olaph has and Yud; when whas, Olaph and Yud have the same.

Pael, Aphel and Shaphel conjugations retain the first vowel immoveable, but the second they change in the same manner as in Peal.

The affix ago is used after Yud, ag after those which end in o servile; this is the ease throughout the conjugations.

Infinitive.

In the infin. Peal the last vowel is taken away, except with the suffixes (a) and (a); but if it be ", as in verbs having Vau the second radical, the vowel remains. In the other conjugations having the termination of 2 is added with the suffixes.

Imperative.

The imper, of all the conjugations, where the middle radical has any one of the vowels, or, does not change its form in the sing., and inserts Yud before the affixes.

The vowel \$\delta\$ in the plu, mase, is remitted to the first radical.

Pael, Aphel and Shaphel conjugations, when the imper, agrees with the pract, cast away the vowel of the 2nd, radical before the suffixes; as, and bring him. But verbs having the middle radicall, or a, as well as some paragogic forms, retain the vowel; as, and if do me good.

Future.

The 1st. pers. of both numbers, 2nd. pers. sing. mase., and 3rd. pers. sing. of both genders preserve the second vowel before the affixes (and pers.) but it

is lost in the others. The remaining persons keep both vowels in all the forms.

The verb L with Affixes.

Those forms of the verb ending in 1, such as the futures and participles, when they use the affixes, are accustomed to change 1 into -, the vowel being retained; as,

There is this peculiarity in the forms terminating in o, that they change o into co or cl; as,

The form a, which is the termination of the 3rd, pers. pret. plu. of all the conjugations except Peal, is changed before the affixes into a; as, ami they tempted, warm, yami.

There are many parts of the verb which follow the regular forms of Lo in every respect, viz. the paragogic forms, the 3rd. pers. sing. fem., 1st. and 2nd. pers. sing. and plu. pract.; 2nd. pers. sing. fem., 2nd. and 3rd. pers. plu. masc. and fem. fut.; and the inf. of all the conjugations, the inf. Peal excepted.

Some instances are met with in the 3rd. pers. plu. mase. of the Peal conj. where the 3rd. rad. Olaph is retained with the affixes; as, which they have built it. This remark applies also to the 2rd. pers. plu. Imp. of both genders; as, wolf loose him, John xi. 14. This custom of preserving Olaph is also found in the partic. Peal as well as in the Imp. sing. and plu. of all the active conjugations; as, when hating me, Ps. ix. 14; when me, Cant. ii. 14.

In the futures, where Yud quiescent follows the last vowel, before the suffixes another Yud is sometimes added; as, or 122 pl do not loose it. Amira, Gram. Chaid, p. 377. Hoffman, however, doubts the truth of this, and is of opinion that the Yud has got into the text in this and other places through the carelessness of editors. See his Gram. Syr. p. 230 In 1 Cor. xii. 31 we have an example of the Yud being rejected; viz. (2021) I will show you. Sometimes we have a used for ', especially before the affixes of the 3rd pers. sing, fem.; as in Peal, Matth. ii. 19, or 123 he would describe him.

In 3rd, pers, prot. plu, fem. the common form is joined

with the affixes much more frequently than the paragraph; as, they healed kim, is found rather than _______.

49. Doubly Defective Verbs.

The irregularities in verbs, it has been already observed, are produced by having as a radical one of the letters Olaph, Vau, Yud or Nun, which in certain situations is dropped, or by having the second and third radicals the same. There may be roots having more than one radical, which is subject to clision or quiescence. Of course it will not happen at the same time that all the letters will disappear or become quiescent; for the principles on which these peculiarities depend cannot operate simultaneously by any combination of circumstances so as to produce this effect. It will therefore follow that some letters of the root must remain in every part of the conjugation, and that in general no two consecutive letters can be at the same time subject to defect. It will be sufficient to consider a few instances of doubly irregular verbs, which may be divided into the following classes.

1st. Verbs with the first radical a Nun and the third Olaph; as, he injuced, Ethpeel where Olaph is changed into Yud; Aphel whi, where the initial Nun is assimilated. So we have has he tempted, Aph. who.

2nd. Verbs having the first and third radicals Olaph; as, |2| he came, fut. Peal |2|2, inf. |2|2, imper. |2, Aph. |4| which possess the defects both of and p. Again, p he lamented, fut. p, inf. ple, imper. |4|

3rd. Those with the first radical Yud and the third Olaph; as, hear, or when he swore, have swore, have swore, have swore, have swore, imper. who Aph. when he green, fut. help, inf. help, imper. who Aph. when he green, fut. help, inf. help, imper.

4th. Verbs having the second and third radicals Olaph. العُن he forbade, whence 3rd. pers. pract. plu. ماغ، inf. العند، imper. أو fut. العند. منا he taboured, fut. الله inf. الله , imper. أو الله , Aph. منا , or منا .

for has the shortened form of the fut. Jos., as well as the ordinary local.

50. Quadriliteral Verbs.

The Syrians have some verbs composed of more than three letters; they are not numerous, and as in Hebrew and Arabic, are chiefly derived from triliteral roots. They are formed by the addition or repetition of a letter, and undergo little or no alteration when the prefixes and affixes are annexed.

I. By the repetition of one or two of the letters

of the triliteral root, and chiefly in those cases when the second and third radicals are the same, or the middle radical Vau (see § 42, 45); thus.

he was exasperated, from the was bitter.

he did often, or practised, from in he did, or made; in all he was made, or became tazy, from in he was lazy. It will be seen from these and the following examples, that the general effect of the duplication is to give increased intensity to the signification of the original word.

- II. Instances of two of the radicals being repeated are, possessed he dreamed for a long time, from he dreamed; with he imagined, from wis.
- III. Some appear to be compounded of two verbs; as, \(\frac{120}{3}\) he was put to shame, from \(\frac{12}{12}\) he was base, and \(\frac{1}{2}\) he insulted.
- IV. By the addition of a letter to the beginning of a word.
- (1) %; as, مسئد he mule poor, مسئد) he be-
- (2) as, as, some he hastened, he neged, from
- (3) 2; ns, post he laught, from post he adhered to, followed.

The letter Vau is sometimes inserted in the middle of a word; as, is he twisted, is he was perplexed, from the root is he bound; is he bove, endured, expected, from is.

Sometimes we have -; as, he did wrong. from he changed, he carried, endured, supported, from he was strong. 5; as, he rolled, from he was strong. 5; as,

At the end of a word we find sometimes the letter is; as, which he made domestic, which he was treated familiarly, from his a house; which he subdued, from his or had under, beneath. Common forms of this kind are wife, when, and wil.

It is unnecessary to give more examples; we will only observe that, in the process of conjugation, these verbs follow in general the principles laid down for triliterals.

51. PARTICLES.

Under this term may be comprehended words which are used in explaining, modifying, and connecting the principal parts of a sentence. They embrace therefore, Adverbs, Prepositions, Conjunctions, and Interjections.

Advertia.

1st. Of time.

at once, together, منتق when اعتبر or مستقدا

yesterday, 12 in the end, at length, =>15 afterwards,

- year then, has now, seed or been to-day, is perhaps,

> peod before, I is immediately, is to-morrow,

> podd at any time, has in not yet, when their

till when there long: had bein until now, we see anddenly.

2nd. Of place.

اَمُوا الْمُعَا الْمُعَا الْمُعَادِ here, hither, اَعْمَدُ hence, الْمُعَا الْمُعَادِ whither t which way t معدد there.

Adverbs of various kinds.

had how ? and greatly, very, sand, some only, and pankow, especially, more, and truly, who more, are fruly, who more, are or applicably, and little, coming already, back (for the so, so, whether? pray? back i.e., or, and where is he? (which is formed from the adverb had and the personal pronoun on), action in the same place, lated from whence? wholly, so but, if, and not, bank lastly, back firstly, taked secondly. From any adjective, an adverb may be formed by adding the termination bala; as, before divinely, belong justly.

Prepositions.

Some Prepositions are prefixed to verbs, nouns, &c., and others are separate words. Those most commonly used are = in, \(\) to, \(\) to, \(\) to, \(\) with, \(\) is from, \(\) and or \(\) is between, \(\) without, \(\) in, \(\) in the out, \(\) is after, \(\) in for, \(\) in, \(\) in about, \(\) against, \(\) is because of, \(\) in upon or against, \(\) with, \(\) is beginned are ording to, \(\) at, near, in the possession of, \(\) is the fore, \(\) in a with or \(\) and \(\)

Conjunctions and Interjections.

These are of or, y-1, 2001, field an, B dadd but, of B if not, unless, and if, B are if not, of if, and therefore, y-gap, for, 2 an, because, y-2 de, but, y-2 test by chance, so therefore, o and, y- when, we interrog. The truly, 2. The when, y-1 also, -1 although.

The Interjections are in hehold, c), (d) O! wold and O that I wo woo! was I pray, is pray (figh. 20), while he is I was hait! happy!

SYNTAX.

52. Syntax of Nouns

The Noun which is put in a state of construction must precede that which qualifies it or limits its signification; thus, and with the womb of his mother, where the half of my goods. This is the reverse of what takes place in Greek and Latin, where the second noun is the one whose form is modified, and this modification is termed the genitive case.

The genitive in Hebrew is indicated by the first noun being put in the constructive state; but, besides this mode in Syriac, it is also very frequently done by placing; before the second noun, as will be presently more especially noticed. The reason of the latter method may be this; that many nouns in the mase. sing, and plu, fem. having the same form in both states, it became necessary to introduce some mark of distinction. Hence it is that examples of the constructive state for denoting the genitive are much more frequent in the plu, mase, than in the sing, mase, and in the sing, fem. than in the plu, fem.; as, المعالمة عند إنها إنها المعالمة بالمعالمة المعالمة المعا the children of Irracl, was ween in the days of Noah,

Bar. Heb. 397. 2; his wife the words of God, will the years of my life, Ephr. Syr. 3, 428. Other examples, where the absolute and const. states have the same form, are in, Sin, ag, in, year, and many more.

Two nouns sometimes come together in regimen, and the second has the force of an adjective; as, may his right ear, Larke xxii. 50; his right ear, Larke xxii. 50; his right eye, Matth. v. 29. See § 22.

Although proper names seldom receive a genitive, yet the names of countries, cities, rivers, &c., for the sake of an accurate description, do sometimes admit of this construction; as, \(\frac{1}{27\frac{1}{27}}\) \(\frac{1}{222\frac{1}{27}}\) \(\frac{1}{272\frac{1}{27}}\) \(\frac{1}{272\frac{1}{27}}\) \(\frac{1}{272\frac{1}{27}}\) \(\frac{1}{272\frac{1}{272}}\) \(\frac{1}{272\frac

women, where we have المناء for المناء, lake i. 25; المناء المناء المناء denying kindness, i. e. ungrateful, ما المناء for المناء for مناء ألمناء أل

The definite state in its primary office is undoubtedly intended to express a definite sense, i.e. it is used to direct the attention to a particular object or objects known either by universality or pre-eminence, or described previously by some circumstance; as, it. Ness the hour was come, the bil I am the rine. It occurs in all the cases where the Hebrew article is used, as may be observed by comparing the Hebrew Bible with its Syriac version. From the same comparison it may also be seen that Syr, nouns are put in the def. state in numerous instances where the Hebrew article in the corresponding words is omitted. Indeed this state has become of much more general usage than in all probability it originally had, and many examples are found where the definite form is employed, which seem to show that it and the absolute are put indiscriminately for one another; for there is no apparent reason why one should have been used in preference to the other. The consequence is that no cortain rule can be given for using the definite state, At the same time its analogy to the Hebrew rt is very certain, and there is no doubt in the early period of the language it was bound by the same laws.

The definite state has so often usurped the province of the absolute, that the latter has in some instances become aboost obsolete. Agrell, however, is quite incorrect when he say in his Supplementa Syntaxeox Syriaca, p. 73. " Absolutum مند mulieres, uxores, non nisi bis reperi, nempe in Assem. T. III. P. I. p. 252 col. 2 line 16, a fine et T. III, P. II, p. 320 line 7 a fine, quam contra ca emphaticum les plus millies occurrit." See Gen. xi. 22, 23, 21, &c., where the absolute form of this noun in the plural is seen. The following are instances in which the absolute and definite forms are used indiscriminately; مندم forty years. Bar Hebrans p. 20, l. 4, and مندم ، تقمل لمكند 7 Jaike ville كنشك تقهم 19, lines 7, 8 تجمع المكند المالية التعلق المكند المالية التعلق المكند المكن Bar. Heb. p. 17. line 9 : 🎉 🗓 nithout ent, i.e. infinite. ils. p. 334, line 1, and | Jam Dy , ib. p. 511, line 13 : 19 innumerable ib. p. 596, lines 7, 9, and pair by ib. p. 577, line from the end; La So every year, ib. p. 240 line 4 from the end. and [Ash Soil, p.28, line 11; was suddenly, Lake ii. 13, and 1 to ib. IX, 39; has low lower, Matth. xxi. 10, and La la Rev. xvii. 12.

When the discourse is respecting some individual thing of a species, the def. state is used frequently in connection with some such word as pa; as, particles a certain youth, Mark xiv. 51; lpm 122 a vectain figuree, Matth. xxi. 19.

The def. state is very frequently found where in Hebrew the constructive would be employed. In

Several words are sometimes found to intervene between the first and second of the nouns so constructed; as, Signal second of the s

The proper names of men do not admit a definite state. A few appear to have it, because they terminate with Olaph; but such nouns are in the absolute state.

A noun is put in apposition with another for the purpose of defining or explaining more clearly. Hence we frequently find employed in this manner nouns like line island, there eity, &c. So also So with an affix, when placed after the substantive, may be mentioned; as. and here the people, all of them, i.e. the whole people.

A noun in a sentence has sometimes to be translated into English prefaced by such expressions as, according to, with respect to, that which attains to, &e; as, with respect to, that which attains to, the throne I will be greater than thou, Gen. xl. 41; come in the incomplex of all them, Joh i. 5.

In Hebrew the particle As is sometimes found before the subject noun, but the Syriac has rarely imitated it in this respect by the use of the corresponding particle As. Nevertheless there are some examples of the prefix being put before the subject; as, last, and and last, has the offence of the cross ceased? Gal. v. 11. See also Matth. xxvi. 11; John xxii. 8.

A plural of excellence the Syrians have not, except a few instances which are found in their version of the Old Testament and which may be consequently regarded as Hebraisms. See Ps. v. 1.

Negative substantives are often expressed by the particle pant before the noun; as, lip p ignorance.

Some diminutive nouns are found. They are denoted by the termination of or wo; as, hoje a little son, hoje a little man, language a small fountain, language a little man, language a little lamb, language a little dag.

. 53. Construction of Adjectives.

Adjectives, whether they are used as qualifying words, or whether they are employed as predicates,

agree generally with their substantive in gender and number. The exceptions to this rule are the same as in Hebrew.

When an adjective, or passive participle, has the office of the predicate, the logical copula being expressed or understood, it is put in the absolute state with the same gender and number as its substantive, and before it; as, (2022) if my sin is greater than Gen. iv. 13. Occasionally the adjective or participle is put after the substantive; as, 120220 the feast is prepared. Matth. xxii. 8.

An adjective is usually placed after the substantive which it qualifies; as, land has the unclean spirit. Some exceptions to this rule exist: when an adjective is made the important word in the sentence, it takes precedence of its substantive; such adjectives are the epithets of saints, holy men and women, &c.; as, made had blessed Paul, with land blessed Mary, &c.

If an adjective, or passive participle be used as an epithet, and it be found in the absolute state, the Dolath is prefixed to it; as, ايما بيدا به the dry fish. Knos. Chrest. p. 76. The same rule is observed with respect to an active participle, used either participially or as an adjective; as, الماء ال

Negative adjectives are expressed in various ways.

1st by µ put before an adjective in the definite state,

when it is used as an epithet; as, Looks pillegitimate; place pirrational; place pindivisible; place pindivisible; place pindivisible. When the negative adjective is employed as a predicate, then it is expressed by placing p before it in its absolute state; as, Looks pinfinite is God.

By sometimes makes the adjective negative. The adjective is in the absolute state and employed as an epithet; as, an epithet; as, an epithet; as, an epithet inexplicable.

A negative adjective is sometimes expressed by \mathfrak{p}_{2} put before a substantive; as, \mathfrak{p}_{2} \mathfrak{p}_{3} without a blot, i.e. immuculate; \mathfrak{p}_{2} \mathfrak{p}_{3} without blood, i.e. bloodless, \mathfrak{p}_{2} \mathfrak{p}_{3} without death, i.e. immortal. A \mathfrak{p}_{3} is found prefixed to the substantive; as, \mathfrak{p}_{3} without knowledge, i.e. ignorant.

When several substantives come together, and an adjective or participle is added to them, it is put in the plural number and mase, gender. See Rom. xvi. 21.

The word is placed before its substantive, and indulges in a pleonastic use of the pronominal affixes; as, his order the whole multitude, Acts. xv. 12; his order all the chief priests, lit. all of them, the chief priests, Matth. ii. 4; had order priests and he took all Asia, Bar Hob. p. 39.

In the comparative degree there is sometimes an ellipsis of the adjective by which the sort or reason of the comparison is indicated; as, line (clearer)

than the noon-day, Job xi. 17; المُعَامِّ الْمَعَامُ الْمَعَامُ الْمَعَامُ الْمَعَامُ الْمَعَامُ الْمَعَامُ الْمَعَامُ الْمُعَامِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِ الْمُعَامِّ الْمُعَامِ الْمُعَامِلُولِ الْمُعَامِلُولِ الْمُعَامِلِيِّ الْمُعَامِلُولِ الْمُعَامِلِيِّ الْمُعَامِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِلِيِّ الْمُعَامِّ الْمُعَامِ الْمُعَامِلِيِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِّ الْمُعَامِ الْمُعَامِلِي الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِي الْمُعِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعَامِلِيِّ الْمُعِلِيِّ الْمُعِلِي الْمُعَامِلِيَّ الْمُعَامِلِي الْمُعَامِلِيِّ الْمُعَامِ الْمُعَامِ الْمُعَامِلِ

The word is sometimes instrumental in expressing the superlative; as, which is the head of my joy, i.e. my greatest joy, Cant. iv. 14. So also is as, limit which is the first-born of the poor, i.e. the poorest, Isaiah xiv. 30.

A word is sometimes placed between the substantive and adjective; as, المُعْدُونُ فِي الْهُ فَيْ الْهُ فَي الْمُعْدُ اللَّهِ اللَّهُ اللَّا الل

54. Numerals.

Cardinal numbers sometimes precede the thing numbered, and sometimes follow it; as, water-pols of two men, Acts i. 10; A lale is it is water-pols of

stone, John ii. 6. So also when thousands are to be numbered, the same observation applies to the numeral which numbers them; as, معمال معمال المعمال المعمال

Cardinal numbers are frequently found to occupy the place of ordinals. In Luke i. 59, we have مُوكُلُ الْمُكُلِّةُ وَكُولُو اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهُ اللّلَّا اللَّهُ اللَّالَّا الللَّهُ اللَّهُ اللَّهُ lit, the day which is eight, i.e. the eighth day; so also, al three hours, i.e. at the third hour, Matth. xx. 3; La six hours, i.e. the sixth hour, Matth, xxvii. 45. In many places cardinal numbers are used for ordinals, and the noun numbered precedes in the constructive state; as, in the to the first year, lit. the year of one, Dan. i. 21; أحمد محكواً كما كالم المرابع lit. in the year of six hundred and one, i.e. in the six hundred and first year, Gen. viii. 13; ") [] كمك كيد the six hundred and fourth year, Bar Heb. p. 100. A cardinal number is in a few instances put before its noun in the constructive state; as, in Matth. iv. 25, we have large ten cities, the Decapolis, lit. a decade of cities.

Ordinals, like adjectives, when joined to substantives, are found in the same gender; as, Line the third seal, line the third seal, line the third beast, Rev. vi. 5. The same rule is observed for cardinals, whether they be employed as cardinals, or whether they perform the office of ordinals.

When the thing numbered precedes the cardinal number, it is usually put in the def. state; as,

ייין היין one year, Bar Heb. p. 22. אוֹב בּייל למין ten days, Rev. ii. 10. Occasionally it is found in the absolute state; as, אבע יייי three years, Luke iv. 25.

When the thing numbered follows the number, it is generally put in the absolute state; as, with three years, Luke xiii. 7. Now and then it is found in the def. state; as, lightly large days, Rev. xi. 11.

The half of any thing is ordinarily expressed by is; as, a so his three days and a half, Rev. xi. 9, 11; or by line; as, which is the half of my goods, Luke xix. 8.

In designations of weights, measures, and times, the noun which expresses the weight, &c. is sometimes omitted, though not so frequently as in Hebrew; as, and thousand (shekels) of silver, Gen. xx. 16; where the word poz is understood. 272 two (loaves) of bread, where the word loaf is understood, 1 Sam. x. 4. 262 thou shalt deny me three (times), where understand mark xiv. 30, 72. Ellipses of other nouns are noticed in Michaelis's Gram. § 130, and Agrell's § 83.

55. Syntax of Pronouns.

The logical copula, as has been already stated, is frequently expressed by one or other of the personal pronouns, and that with the *linea occultans*. But when existence is meant, the substantive verb is used,

and this without the linea occultans; as, jon منت منت الله in him was life.

fil, on and so take the linea occultans under the first letter when they express the logical copula. on and so also frequently remit the vowel to the preceding word, or east it away altogether.

The same pronoun is repeated in many instances, so that the former is the subject and the latter occupies the place of the logical copula; as, if if I am, John x. 9; in light 2 in we are disciples, John ix. 28. When personal pronouns are put for the substantive verb, they sometimes coalesce with the preceding word; so that the pronoun and it become one word. See § 25, p. 61. Thus we have also what is I also who is I am is a debtor, Gal. v. 3. and is good, Assemani, T. iii. p. 292. is manifest, Gal. iii. 11. iii. we have I we have a we hunger, 1. Cor. iv. 11.

The affixes to verbs, although usually expressing an accus, yet sometimes denote other cases, especially the dative; as, when then hast given to me, Josh. xv. 19, as if when the ablative; as, which distant from thee, I's. lxxiii. 27. When the second of two nouns in regimen has the force of an adjective, the pronominal affix is appended to it rather than to the former; as, when the name of my holiness, i.e. my holy name, I.ev. xx. 3; when the city of thy

holiness, i.e. thy holy city, Dan. ix. 24. Some few exceptions to this rule are found; see Matth. v. 29, 30, 39; Luke xxii. 50.

The affixes are used passively in some instances; as, which is not my prayers, but prayers offered up to me, Isaiah lvi. 7; see also Exodus xxi. 20; Isaiah xxi. 2; Bar Heb. 218. 14.

A peculiarity of the Syriac language is to be met with in the redundant use of its pronouns; in such cases as,

- 1. Affixes when they are placed before Dolath of the genitive; at least they are of no use when translated into our language; as, lit. the fame of him who is Jesus, i.e. the fame of Jesus, Lioing of the daughter of Herodias.
- 2. The affix of the verb, when the noun to which it refers is placed after it; as, and it is and he sent, cut it off (I mean) his head, i.e. and he sent, and cut off his head. Matth. xiv. 10. Often the noun has a particle prefixed to it; as, like a particle prefixed to it; as particle
- 3. When the affix is annexed to a preposition, a similar construction is observed; as, in it, the hour, i.e. in the hour. Sometimes

the preposition is redundant as well as the affix; as, المنتقات و وصل but in the days, Matth. iii. 1; محمد محمد مناله him, with Christ, i.e. with Christ, Rom. vi. 8; محمد منتقب في from these, 1 Tim. i. 6.

4. The pronoun con or on in such instances as if on him goeth to the belly, Matth. xv. 17, on lease on by faith, 2 Cor. i. 24. It was on lease so I speak, John viii. 28. The pronoun conor on when it coalesces with the preceding word, is sometimes redundant; as, and means not only who is? but often only who? See Matth. iii. 7. Also and what. See Matth. xii. 7. and to thee, is frequently found in Asseman. Biblioth. Orient. See Tom. iii. p. 293, lines 5 and 6.

The pronouns he himself and the same the Syrians have not, but they are expressed by a little circumlocution; as,

- 1. By a repetition of the personal pronoun with the particle placed between; as, p can these same sacrifices, Heb. x. 1.
- 2. By the juxta-position of the pronouns on on; us, 200 | And 1202 on one and that same day was the sabbath, John v. 9.
- 3. By with an affix; as, "In the month

- of June أَكْنِهُ مِنْ مُعْلِي of the same year." Mich. Chrest. p. 69, "Bishop المُعْلِمِينَ وَعُلِمِينًا of the same city." Assem. T. I. p. 28.
- 4. By the composition of the personal and demonstrative pronouns; as, con and hon, con and hon, con and hon, con and hon, con the himself when he came, Bar Heb. p. 508, line 14; line con the same, Matth. v. 46. See § 25, p. 61.
- 5. By an affix put to a noun; as, منافحة عدم in his day, i.e. in the self-same day he died, Bar Heb. p. 278, line 10.
- 6. By họi spirit; as, σμοὶ μοῦ destroyed himself, Sirach II. 22; by hh essence; as, μολ thyself, Cant. I. 8; by hος μος πρόσώπου person; as, σμος μον himself, Assem. T. I. p. 485.

The prefix of a particle to بن is frequently observed; as, من بنيك he whose it is, Gen. xlix. 10. Sometimes a preposition is found before it; as, من بيك from mine, John x. 14.

An affix annexed to the word is frequently employed as a possessive pronoun (§ 28), when the sentence would be rather ambiguously expressed by placing the affix to the noun or the verb; as, if the kingdom, Matth. vi. 18;

received him not, John i. 11. These possessive pronouns serve also to give a particular energy* to the word to which they belong; thus المان المان my time, John vii. 8: this is especially the case when the affix is likewise added to the noun; as, من المان ا

A pronoun is in some instances found before the noun to which it refers, and is placed at a considerable interval from it; thus, hop side would its foundations are in his holy mountain, Ps. lxxxvii. 1, i.e. the foundations of the city of our God: only ober occurs in v. 3. Such construction exists principally in the version of the Old Testament, and on that account may perhaps be regarded merely as a Hebraism.

On the other hand, examples are met with where the pronoun comes after the antecedent, but is separated from it by so long an interval, that for the sake of more accurate speech the noun itself ought to have been employed; as, Isaiah xlv. 13, مذب إذا المادة raised him up, viz. Cyrus, who is mentioned in verse 1.

[•] In Syrian translations from the Greek, according to Hoffman, with an affix is not to be considered as giving any especial energy to the word to which it belongs; but only as being a stricter rendering of the Greek possessive, Gram. § 122. This remark of the distinguished Grammarian rests on no certain foundation.

Pronouns sometimes do not relate to the noun which is nearest, but to one going before and perhaps separated from them by a long interval; as Psalm xliv. 3, (a) A كَنْ عَلَامُ الْمِيْرُ الْمِيْرُ الْمِيْرُ الْمِيْرُ الْمِيْرُ الْمِيْرُ الْمِيْرُ الْمِيْرِ الْمُعْرِ الْمِيْرِ الْمِيْرِ

On the other hand, the noun itself is sometimes repeated, instead of using a pronoun; as, Gen. xvi. 16, Abram was eighty-six years old when Hagar bore Ishmael to Abram point.

The Syriac writers occasionally indulge in a change of the person of the pronoun; especially, from the 2nd. to the 3rd. pers. and vice versa; as, Luke xiii. 34, O Jerusalem, Jerusalem, Jerusalem, Luke xiii. 34, O Jerusalem, Jerusalem, Jerusalem, Luke xiii. 34, O Jerusalem, Jerusalem

Those nouns which have only the plural number sometimes use pronouns in the sing. numb. and sometimes in the plu.; as, Luke xxiii. 45, عَامُ اللهُ عَامُ اللهُ عَلَى اللهُ عَ

mase. pronoum; as, Bar Heb. 121. 15, פּבְּׁם מִּׁם הַ וֹּבְּים וֹשׁ הַ וֹּבִּים וְעֹבּים וֹשׁ he led away his family and shut them up.

An interrogative is sometimes preceded by a noun in the constructive state; as, I is the daughter of whom art than? Gen. xxiv. 23; or, which is equivalent to it, the def. state of the noun is used, and Dolath prefixed to the interrogative; as, the interrogative; as, is from the hand of whom have I received?... I Sam. xii. 13.

Relative pronouns are usually expressed by prefixed to words; or by the interrogative pronoun and (§ 26). Sometimes the personal pronouns with Dolath constitute a relative; as, con who made, Ephes. ii. 14; only con which is; Ephes. i. 14; con which is; Ephes. i. 14; con who took, Matth. xxv. 1. prefixed to a personal pronoun makes a relative; as, con who made. Matth. xix. 12.

Relative pronouns of the 1st and 2nd persons are likewise expressed by 2; as, d22 | of O man, who judgest, Rom. ii. 1; who are, Acts xxv. 24.

An oblique case of the relative Dolath is indicated, 1st, by connecting with the Dolath a personal pronoun put in that case; as, a to him, a to her, a to whom, and to them, and? to whom, and in him, and? in whom, and in

them, عرف in whom, عن to me, الله to whom, ألم to thee, الله to whom. 2nd. By an oblique pronominal affix to the verb and Dolath; as, "I am Joseph your brother المنافية whom ye sold. Gen. xlv. 4. 3rd. By an affix to a noun and ?, the noun having also a preposition prefixed; as, منافية أعلى المنافية ال

The accus. of is sometimes marked by this letter alone, without any connection with a pers. pronoun; as, if man whom He had formed, Gen. ii. 8; all things, which He had made, Gen. i. 31. Other oblique cases of the rel. are occasionally expressed by alone.

The relative pronoun פּסֹה, forms its oblique cases thus; סֹה oٰה in whom, masc. &c. We have also הֹב יָבֿה in whom, fem. Asseman. T. III. p. 374.

The oblique cases of the relative pronoun; on are expressed by an affix following; as, on whom she brought up, Bar Heb. p. 297.

The pronoun; is occasionally omitted, but not so frequently as the relative in Heb; as, hipo and he who is able, where his is put for play. See also Ps. xxxii. 2; Bar Heb. 487. 1.

Reflective pronouns (see § 28) are expressed by with the affixes; as, oran & against itself, Luke xi. 17: by Ecoio substance; as, oscoio Ss against itself, Luke ii. 17: occasionally by Land; as, onis have and Sarah laughed within herself, Gen. xviii. 12. The words and and are often employed to express any one; as, إِنْ الْمُ بِإِنْدِ if any one shall say to you, Matth. xxiv. 23. Again something or anything is signified by جُمْكَا, as, Gen. xviii. 11; المَّنَا مَنْ الْمَانِ اللهِ اللهِي المَا اللهِ اللهِ اللهِ اللهِ اللهِ اللهِ اللهِ اللهِ اللهِ اله thing too great for the Lord? The word 150,00 word, thing, is likewise thus used. See Exod. xviii. 26. So also is you any thing. See Matth. xx. 20; Levit. v. 2. We have also a certain one; as, أيدًا سَبُّا ; to a certain city, Luko x. 38 كَمَهِمُّا سَبُّا a certain noman, Mark vii. 25. and are sometimes joined together in this sense; thus, to a certain one, Assem. T. I. p. 82. in one حسب صح مقعداً ; used thus ; المعنى من in one of the days, i.e. on a certain day, Bar Heb. p. 127; or محتى only is employed in the same way; as, محتى أستوي ما a certain one of his brethren, Bar Heb. p. 167. ban 👟

some of the branches, the Syriac translation of τινες τῶν κλάδων. Rom. xi. 17. Also [λω] there are those who say, i. e. certain say, Assem. T. I. p. 10. This is another mode of expressing the Latin quidam.

One ... the other by بِسُونَ ... بِمَّةٍ as, بِمَانَ مِسْ مَالَ مُعْدَالِهُ مَالِهُ مَالِعُلِمُ مَالِهُ مَالِهُ مَالِهُ مَالِهُ مَالِهُ مَالِهُ مَالِعُلَاهُ مَالِعُلِمُ مَالِعُلِمُ مَالِعُلِمُ مَالِعُلِمُ مَالِعُ مَالِعُلِمُ مَالِعُلِمُ مَالِعُلِمُ مَالِعُلِمُ مَالِعُلِمُ مَالْكُولِ مَالِعُلِمُ مَالِمُ مَالِمُ مَالِمُ مَالِعُلِمُ مَالِعُلِمُ مَالِعُلِمُ مَالِمُ مَالِمُلِمُ مَالِمُ مَالْمُعُلِمُ مَالِمُ مَالِمُ مَالِمُ مَالِمُ مَالِمُ مَالِمُ مَالِمُ مَالِمُ

56. Syntax of Verbs.

Agreement of the Verb with its Subject.

A verb agrees with its subject in gender, number, and person; as, الْمَا عُوْمَ الْمُ الْمُعُمِّلُ عُلَيْمُ عُلِيْمُ الْمُعَمِّلُ اللهِ اللهِ اللهِ اللهِ اللهُ اللهُ عَلَيْمُ اللهُ الله

Nouns which are used only in the plural number will receive a verb either in the sing. or plu.; as, أَمْ مَنْ الْمُعْنُ مُنْ الْمُعْنُ أَنْ الْمُعْنُ وَمُعْنُ الْمُعْنُ وَمُعْنُ الْمُعْنُ وَمُعْنُ الْمُعْنُ وَمُعْنُ اللّهُ الللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ ا

and the life is the light of men, same place. The former is grammatically termed constructio ad sensum, and the latter constructio ad formam. Several other exceptions are found to the foregoing general rule, which, although not so frequent, are of much the same character as those which exist in Hebrew.

When several substantives come together, the verb belonging to them is put in the plu, numb, mase, gender.

Collective nouns are, on account of their signification, joined to a verb plural; as, il. army, in Bar Heb. Chron. 109. 18, and in another army entered. See also ib. 121. 2. 3; Assem. Bibl. Orien. 1. 372. 15. all, oon and upon all who were with me. In this manner of construction we find an interesting. In this manner of construction we find an interesting. In this manner of construction we find an interesting in the sing. It is all in the sing. It is all in the plu. numb.; as, all in the verb is put in the plu. numb.; as, all in the verb is put in the plu. numb.; as, all in the verb is put in the plu. numb.;

A verb. sing. is sometimes joined with a plur. noun when the verb precedes, especially A and A ; as, I Sam. i. 2, his of A he had not sons; of log A complete there were in it five porches, John v. 2. Matth. iii. 16, his of the heavens were opened unto him; his A it the fugitives felt upon. Bar Heb. Chron. 144. 6. 7.

A verb sing. is also occasionally joined with a plur. noun, when the verb follows; as, ام المنتذ the days were, Bar Heb. p. 581. 8; متذا بذ the elders ruled. Bar Heb. p. 16. 8. In this example, and others in illustration both of this and the last paragraph, the plur. may be intended. The o or at the end of the verb may have been omitted, as we know that not unfrequently it is.

Verbs, adjectives and pronouns have no dual number. Hence the numerals is masc. and fem., with the noun which they qualify are joined to a plur. verb; as, coording two shall be, Matth. xxiv. 40. See also Matth. xix. 5, and Luke xvii. 35, 36.

Collective nouns of the fem. gend. are often found with plu. verbs of the masc. gend.; but this diversity of gend. may be required by the sense; as, اِنْجَا مَا مُعْمَ all the earth weep, 2 Sam. xv. 23, where عمد المعنى all the earth; similarly, Gen. xli. 57, مِنَا إِنْمَا عَلَى all the earth came, i.e. all the people of the earth. المعنى is thus constructed in Bar Heb. Chron. 148. 16. The proper names of places are for the same reason sometimes connected with verbs and pronouns of the plu. masc.

There are many examples collected by Hoffman and Agrell of a difference in gender between the subject and predicate; as, in a cocasion was

When a substantive is of the common gender a diversity of gender is sometimes found between the verb, adjective and pronoun in connection with it; as, on some found when any one shall offer an offering, his offering shall be flour, Levit. ii. 1; where we have joined to found the fem. and the mase, affix of.

When many nouns come together connected by the conjunction o, the verb belonging to these nouns is put in the plur. number; as, source less sources, and John and Mudrew asked him, Mark xiii. 3. See Gen. viii. 22, Ex. xvii. 10. There are exceptions to this rule; especially where the verb is put first; as, source and Noah and his sons entered, Gen. vii. 7. Occasionally an exception is found, when the verb follows the subject; as, had it become law a shield and spear were not seen, Jud. v. 8.

When the nouns coming together as mentioned in the last paragraph differ in gender, the gender of the verb agrees with that to which it is nearest; as, ciolo which and Aaron spake,

Numb. xii. 1. رَبِعُونُ الْمُعُوا الْمُعُوا , justice and peace shall kiss each other, Ps. lxxxv. 11.

The 3rd. pers. of verbs sometimes admits an anomaly as to gender; as, lais oon there were camps, Bar Heb. Chron. 324. 5; see Mark xiii. 21, and many other places.

The 3rd. pers. sing. both of the masc. and fem. gender, in passive as well as in active conjugations, is sometimes used impersonally; as, وَمَنُ it will be evil to you, Jer. vii. 6; مَنْ اللهُ it was good to us, Deut. vi. 24: مَنْ اللهُ it happened to him, Luke i. 9.; مَنْ اللهُ ا

When two nouns come together, the latter being ruled by the former, the verb occasionally agrees in gender and number with the latter; as, مَكْمُتُ لُو اللهُ الل

Occasional uses of the Tenses.

Use of the Praterite.

Besides the past, the preterite is occasionally employed to express other times.

It is found, as may be inferred from the preceding paragraph, that the praeterite is sometimes employed to express a prophetic fut, as in Heb. On this point it may be well to quote the following remark of Hoffman: plerumque in revious V. T. Syriaca ab interprete tatia praet, cum, fut, commutantur, qua ex re Syris ad hune morem Hebraicum nullam fuisse propensionem cernitur. Gram. p. 333.

There are hypothetical sentences in which it is assumed that the thing spoken of will come to pass: in such cases, therefore, the priet, is the natural form to employ; as, comba when you are in trouble and all these things have come upon you, Deut. iv. 30.

We find the præt. of the substantive verb followed by the participle of another verb not unfrequently denoting the present of the conjunctive; as, "we require from you which it is conjunctive; as, "we require from you which it is usually done by the fut., sometimes assisted and sometimes not by particles accompanying it, as will be found stated more fully in the section which follows.

The præterite has sometimes the force of the pluperfect; as, عَدْمُ اللهُ الل

In Syriac, as in Hebrew, the practerite is in some instances used where we should employ the present; as, Lin I know, lit. I have known, as comprehending certainty and decision; I know and I am resolved to act on this knowledge, Luke xvi. 4. See also John xi. 4. The praeterite likewise denotes present time when condition and state عُمْنًا آلِدهِ كُو مُحْمَدًا ألامعيّ أَمْتِ (are implied; as, حُمْنًا why art thou displeased, and why is thy countenance sail? Gen. iv. 6; Lai Lail my soul is disturbed, Ps, exviii. (Heb. exix.) 28. It is likewise employed in sentences in which the truths enunciated are general, and not at all dependent on time; as, Ps. i. 1, " Blessed is the man, who walks not (hath not walked), So ii in the counsel of the wicked." Indeed the practurity in the last example evidently expresses the sentiment contained in it with more acouracy, because with more generality, than the present; for we may suppose the blessedness to be the consequence, not so much of not walking in the counsel of the wicked at some particular instant of time, as of not having walked, or of not having been in the habit of walking, at any one period of life.

The preservice is used for the imperfect in hypothetical sentences, although the future is much more frequently met with in such cases; as, for your polyment of we should have been like unto Sodom, Isaiah i. 9. In a conditional sentence the pluperfect is likewise indi-

cated by the præterite form; as, $\stackrel{\sim}{\sim}$; $\stackrel{\sim}{\sim}$ \stackrel

Use of the Future.

The future is occasionally found in the place of the present; as, (a) Liai he causeth them to inherit (or giveth them) thrones of glory, 1 Sam. ii. 8. See also Isaiah xliii. 17.

The fut. is almost always used when the verb implies something conditional or potential, and this is done sometimes with and sometimes without any accompanying particles. Hence it includes all those forms of speaking, where in English we use one of the auxiliary verbs, may, can, let, would, &c.; as, in may the evil (of the wicked) come to an end, Ps. vii. 9; in a coord may the life of the child return, 1 Kings xvii. 21; in he would deliver him,

Ps. xxii. 9; سُوهُنُو let them shew thee, Isaiah xix. 12;

A prohibition in Syriac, as in Hebrew, is invariably expressed by the future; as, Li thou shalt not fear, i.e. fear not, Gen. xlvi. 3; Sodož ji thou shalt not kill, or, do not kill, Exod. xx. 13; مزمند پُ thou shalt not call me, i.e. do not call me, Ruth i. 20. The imper, is sometimes denoted by the fut, when there is no prohibition; as, sinai soni let there be light, Gen. i. 3. The particles; and he are often connected with the fut, when a potential signification is intended; as, of the be would grant to him time, Dan. ii. 16; careai p. that they may not hearken, Gen. xi. 7. The prefix o sometimes gives this force to the verb; as, carro that they may know, Ezek. xx. 26; that they may sacrifice, Exod. viii. 8. is also found hesides ; as follows; هَذَهُ اللَّهُ اللَّهُ اللَّهُ فَعَلَى اللَّهُ اللَّا اللَّا اللَّهُ اللَّا اللَّهُ اللّل that my soul may bless thee, Gen. xxvii. 4. Other particles in some instances accompany;; as, Bar Heb. Chron. 530. 14, - out obe on; See that they might deutroy it; sepal: ... hon lial el, although (ye shall say) to this mountain that it be removed, Matthew xxi. 21. The imperfect conjunctive is often formed by means of the fut. and the auxiliary verb loon; un, ocon causai le liail so that they were not able, Mark iii. 20; ارم مدني المناس بنامنع المنية: منه that the security of the city might be established, Assem. Bibl. Orien. 1. 393. 2. So in Arab. we have the pluperfect and imperf. formed by putting the præterite of the verb عَلَىٰ لَا لَكُمْ before the præt. and future of another verb; as, عَلَىٰ كَتَبُ he was writing, See Stewart's Arab. Gram. p. 64.

A future is often expressed in the way of periphrasis. A participle and the fut. of the verb for sometimes come together having the force of the fut.; as, where they shall send, Assem. T. III. p. 347. Assem. T. III. p. 347. Departure of my Lady Mary from this world, p. 1. 1. 3, by Dr. W. Wright.

The word is similarly to the Greek $\mu\ell\lambda\lambda\omega$ is sometimes joined to a verb in the infin. with , and the two express jointly the future tense; as, we shall stand; perhaps we shall shortly stand; literally, we are about to stand, Rom. xiv. 10. See Schaaf's Lexicon under ... Sometimes the future of the verb following is found instead of the infin. with the prefix; and occasionally without it, as, which is seems to me that ... Says Agrell; Supp. p. 21. But it seems to me that ... has rather the force of the infin. The expression consequently should be rendered, is about to glorify, where the idea of incipient future time is contained in ... John xxi. 19.

We have a fut. with prefixed in such a construction as the following; as, ابناه he feared to go,

Matth. ii. 22, where we see the fut is employed, when in English we should use the inf. See ib. xvi. 3; Mark i. 15, 6, 7; Luke xiii. 11; 1 Cor. ii. 14.

Use of the Infinitive.

An infinitive connected with a finite verb adds intensity to it, or denotes what is signified by the verb to be certain, fixed or continual; as, had a will greatly multiply, Gen. xxii. 17; volume A had been accurately depicted, Gal. iii. 1.

When an infinitive is governed by some verb signifying will, power, or command, it has generally prefixed; as, which have the way? John xiv. 5; only on limit to know the way? John xiv. 5; only on limit he seat him to feed swine, Luke xv. 15; only on local log log and he wished to slay him, Matth. xiv. 5.

After the verb few the inf. with nay be rendered in English by the participle; as, محدّ المحدّ المحدّ المحدد المحد

The same remark is applicable to A., when it is employed as low is in the preceding example; as, in the preceding example; as, it is not adding to it, nor taking from it. Eccles. iii. 14.

It is not unusual for the infinitive to be found in connection with other particles besides the Lomad prefixed to it, giving to the said infinitive a participial effect; as, الْمُعْنَ الْمُعْنَى الْمُعْنِينَ الْمُعْنِينِ الْمُعْنِينَ الْمُعْنِينِينَ الْمُعْنِينَ الْمُع

Use of the Imperative.

The imperative is not only employed to express a command, but also an exhortation, admonition or permission; as, John xi. 15, عُدُمُ عُدُمُ go ye hither. See also Mark i. 38.

The imper. of the verb | \hat{L} | is frequently found in connection with a finite verb in the fut. tense; thus, \hat{L} is frequently found in connection with a finite verb in the fut. tense; thus, \hat{L} is \hat{L} in and now come, we will make a covenant, i.e. and now come, let us make a covenant, Gen. xxxi. 44; \hat{L} o \hat{L} come, we will go, John xi. 7.

We have also the imper. in such constructions as the following; I will give you the best of the land of Egypt, الفائة على الفائة عل

An imperative is occasionally found in connection with a participle; as, All cease, be thou still, Mark iv. 39. It may be that the imper. in-

fluences the word which follows, and renders the expression of the substantive verb unnecessary, it being ordinarily used with a participle when an imper. is intended. In uttering a command it is natural not to use more words than are necessary. The same construction may be seen in Assem. Bibl. Orient. T. f. p. 40.

Participles.

The participle is timeless, i.e. it has no time of its own, but partakes of every time with which it may be connected. Thus, pres. most frequently. The fut.; an, on land with shie, on his with Therefore that which shall be born of three is holy, Luke i. 35; أنك بك أبك بذا thy wife shall bear to thee a son, Gen. xvii. 19. The pract.; as, Behold their Lord, Also \ \tes fallen and dead, Judges, iii. 25. Participles, when they are taken as such, and not for the present tense, have placed before them for the most part the particle is or the prefix ; as, Ais حَرَفَ عَلَمُ عَلَمُ عَمْدُ وَعَلَمُ عَلَمُ عَلِمُ عَلَمُ عَلِمُ عَلَمُ عَلَمُ عَلَمُ عَلَمُ عَلَمُ عَلِمُ عَلَمُ عَلَمُ عَلَمُ عَلَمُ عَلِمُ عَلَمُ عَلَمُ عَلِمُ عَلِمُ عَلِمُ عَلَمُ عَلَمُ عَلِمُ عَلِمُ عَلِمُ عَلَمُ عَلَمُ عَلِمُ عَلَمُ عَلِمُ عَلَمُ عَلَمُ عَلِمُ عَلَمُ عَلَمُ عَلَمُ عَلَمُ عَلِمُ عَلِمُ عَلَمُ عَلِ has wandering from house to house, 1 Tim. v. 13; he saw Levi sitting, Mark ii. 14. living or aline, def. is subject to the same construction; as, his is construction and he gave her to them alive. Acts ix. 41.

We find a participle usurping as it were the office

of an inf. after verbs of beginning and continuing, of permitting and commanding, and also of power; as, المنافذة المنا

The active participles are in some instances found in the constructive state; but which are rendered into English as if they were in the absolute state. In such cases they are followed by a noun; as, line with descending the ditch, i.e. into the ditch, Prov. i. 12; is entering in at the gate, Gen. xxiii. 10; knowing the law, Rom. vii. 1.

Similarly passive participles observe this government; as, is clothed with linen, Ezek. ix. 2;

born of women, Matth. xi. 11.

Although in Syriac the use of participles is very great, yet in translating Greek books into Syriac they sometimes render a Greek participle by a Syriac verb, especially where the Greek participle is followed by a verb, in which ease the two verbs in Syriac have the same mood, tense, and person; as, and and anopolebres efectionere, yo, empire, Matth. ii. S; and his elder proserving, I will yo, I will worship (him), ib.; the participles is very great in the same mood, tense, and person; as, and anopolebres effectionere, yo, empire, Matth. ii. S; and his elder have the proserving, I will yo, I will worship (him), ib.; the participles is very great they are the same mood, tense, and person; as, and a participle is followed by a verb, in which ease the two verbs in Syriac have the same mood, tense, and person; as, and a property of the same are the controlled the same mood, tense, and person; as, and a participle is followed by a verb, in which ease the two verbs in Syriac have the same mood, tense, and person; as, and a property of the same mood, tense, and person; as, and a property of the same mood, tense, and person; as, and a property of the same mood, tense, and person; as, and a property of the same mood, tense, and person; as, and a property of the same mood, tense, and person; as, and a property of the same mood, tense, and person; as, and a property of the same mood, tense, and the same mood, tense, and tense is the same mood, and the same mood,

The Imperfect and Pluperfect Tenses.

It is stated in § 34 how these tenses are formed. Examples of the Imperfect are the following log they he went, Matth. ii. 9; Lad, one cognition they who sought the child's life, ib. ii. 20; Lion some I testified, Acts xx. 21.* Examples of the Pluperfect are,

[&]quot;Uhlemann in his Gram. 465, says: "Auch ohno loor Matth. iii. 5.

الْمِعَالَىٰ مَا الْمِعَالَىٰ الْمِعَالَىٰ الْمِعَالَىٰ الْمِعَالَىٰ الْمِعَالَىٰ الْمِعَالَىٰ الْمِعَالَىٰ الْمُعَالَىٰ الْمِعَالَىٰ الْمُعَالَىٰ الْمُعَالَىٰ الْمُعَالَىٰ الْمُعَالَىٰ الْمُعَالِّمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعِلَّمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعِلِمُ الْمُعَلِمُ الْمُعِلِمُ الْمُعِلِمُ الْمُعِلَّمُ الْمُعِلِمُ الْمُ

The præterite, however, followed by the substantive verb log does not always make the pluperfect; but only the præterite, or imperfect; as, log he began, Mark i. 45; log log log light the time was not, ib. xi. 13.

loon, Aal and Aas

In addition to what is said of these verbs in sections 33 and 34, we subjoin the following remarks. The substantive verb los seems to be employed in some passages for the purpose of giving emphasis to them; as, (a) is los left for it was not ye speaking, Matth. x. 20. Hoffman says these words may be more accurately expressed by the French; ce n'est pas vous, qui parlent. Livil los les los les les los les les not unusual for los let to express a negative put interrogatively; as, les les los les les Matth. xx. 25; Luke xi. 40.

ြို့တာ is pleonastic in some instances, i.e. it is made

no account of in the translation of the passage in النكرا وكشَدا أو من المناس من النكر الكرا الكرا (عديد which it occurs; as, منابك النكرا الكرام المناسبة المناس the trees and herbs were not created with the earth. Ephraim T. I. p. 21. καὶ ἐγίνετο of the New Testament is translated by loso, or o being usually prefixed to the following verb; as, 0210 من المناه إلى المناه إلى المناه المن come to pass on the eighth day that they came. Luke i. 59. In some places neither ; nor o is prefixed to the following verb; as, " إِذَا رَفْعَ الْمُعْدَة وَمَنْ وَالْمُونَا لِهُ اللَّهِ عَلَى اللَّهِ اللَّهِ اللَّهُ اللَّهُ اللَّهِ اللَّهُ اللَّالِي اللَّهُ اللَّا اللَّهُ اللَّاللَّ اللَّهُ اللَّهُ اللَّهُ اللَّا اللَّهُ الل it came to pass in those days Jesus came, Mark i. 9. Sometimes καὶ ἐγένετο is passed over in the Syriac version without any notice. See Matth. ix. 10; Mark iv. 1: Luke ii. 16. The imperfect tense of loo is formed by placing it after Ad with the affix to the latter agreeing in gender and number with the noun or pronoun with which it is connected. See § 34. Asl is, however, occasionally found without an affix; as, الله منا من من الله الله الله من الله منا الله Matth. xxii. 25. loo is observed in a few instances standing before instead of after A.]; as, agold for it was, Bar Heb. p. 94, line 7. Sometimes loo disappears and Al itself is made to express past time; as, Line another! I'm so will you stood over where the young child was, Matth. ii. O. Again, although as a rule, the Imperfect Tense agrees with its subject in gender and number; yet foo Al is to be met with in a sentence without any regard to this agreement; as,

ارم هما المحدد المحدد

مَا composed of μ and λ takes the affixes in the same way as λ (see § 34), and when followed by Lomad with a pronominal affix signifies to have not; as, مَا مُا مُنَا يَعُمُ عُمْ اللهِ who hath not, Matth. xiii. 13. See also Luke ii. 7; John iv. 17. It has usually prefixed.

Regimen of Verbs.

A transitive verb exercises an influence over a noun or pronoun which follows it, either immediately or mediately, and which limits its signification. The noun or pronoun may be with or without a preposition; as, عَمْ الْمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَا لِمُعْمَالِهِ لَمُعْمَا لِمُعْمَالِهِ لَمُعْمَالِهِ لَمُعْمَا لِمُعْمَالِهِ لَمُعْمَالِهِ لَمُعْمَالِهُ وَمُعْمَالِهُ لَمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لَمْ لِمُعْمَالِهُ لَمْ لِمُعْمَالِهُ لِمُعْمَالِهُ لَمْ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لَلْمُعْمِعُلِهُ لَمْ لِمُعْمَالِهُ لَمُعْمَالِهُ وَالْمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ مِنْ الْمُعْمَالِهُ لِمُعْمِعُمُ لِمُعْمَالِهُ لِمُعْمَالِهُ مُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ مُعْمَالِهُ لِمُعْمَالِهُ مُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمَالِهُ لِمُعْمِعِيْمِ لِمُعْمِعِيْمِ لِمُعْمِعِيْمِ لِمُعْمِعِيْمِ لِمُعْمِعِيْمِ لِمُعْمِعِيْمِ لِمُعْمِعِلِهُ لِمُعْمِعُمِي لِمُعْمِعُلِهُ لِمُعْمِعُمِعِمِي لِمُعْمِعُمِعُمِعُمْ لِمُعْمِعُمُ لِمُعِمِعُمُ لِمُعْمِعُمُ لِمُعْمِعُمُ لِمُعُمِعُمُ لِمُعُمِعُمُ لِمُع

Verbs which are doubly transitive, such as transitive verbs in those conjugations which are causative, exercise this influence over two such nouns or pronouns; as, المُعَادُ أَلَّهُ اللهُ الل

The passive conjugations of verbs oftentimes express the cause or motive of action by the particle in some such manner as the following; call couls? that ye may be seen by them, Matth. vi. 1. that ye may be seen by them, Matth. vi. 1. that ye may be done by you, Exod. xii. 16. See also Luke viii. 29; John viii. 33; Acts xv. 24; xviii. 18. In the same sense the preposition is used; as, that is is a self-couls.

It is not unfrequent that verbs in the passive conjugations have the force of active conjugations, and admit an accusative; as, \(\frac{1}{2} \) he remembered his mercy. Lake i. 54. In like manner the passive participle of the peal conjugation has in many verbs the force of the active participle; as, \(\sigma \) \

Verla used for Adverbs with or without a Conjugation.

It is not uncommon to see two verbs coming together, one of which performs the office of an adverb to the other, each verb being in the same number, gender, and tense; as, who has taken much 2 Cor. viii. 15; output and hath greatly exalted him, Phil. ii. 9; and find I will again feed thy flock, Gen, xxx. 31; i.o. and Again he sent, Luke xx. 11, 12;

they entreated (ofice Model and process if that it should not be spoken to them any more, Hebr. xii. 19; (1) it is head the letter craftily, Bar Heb. p. 100.

The second verb is occasionally found in the future with prefixed; as, $\hat{\vec{a}}_{i}$ (the suspicion) was near to be confirmed, i.e. (the suspicion) was almost confirmed, Bar Heb. p. 551, line 11.

The participle of the second verb is found, as we might expect, as well as any other inflection of it; as, which book he desired as it admire ing it, might admire, i.e. that he might read it admiringly, Assem, T. II. p. 345, line 31.

Miscellaneous Observations.

The ordinary method of expressing a reciprocal or reflective sense is by a transitive verb with the noun united to the affixes. But it is also in some instances done by means of the passive conjugations. In the Ethpeel; as, Let urned himself, Matth. ix. 22. See also John viii. 6, 7, 59.

Neuter verbs have sometimes a passive signification; as, L to wander, for to be deceived, πλανασθαι, Luke xxi. 8; he burnt, for was burnt, Matth. xiii. 30; he fell, for he was cast down, John iii. 24; he ascended, for was extracted, was torn up, as trees which are torn up by their roots.

There is no form of the verb expressing the Optative mood. For this purpose the future of the Indicative (see the use of the fut. p. 163) is ordinarily used, the context or some particle determining that this sense of the verb is required. The pronounce sometimes serves this purpose; as Fig. 12 does in Hebrew. Hence in Numbers xi. 29 we have the Lord were prophets; Judges ix. 29: and the ford were prophets; Judges ix. 29: and the people of the Lord were prophets; Judges ix. 29: and the form into my hands. It too is found to indicate the Optative mood; as, that we might die, Ex. xvi. 3. Hoffman and Agrell have collected passages in which one of the particles and, and, and, is employed to denote this mood.

Compound words in Greek are translated into Syriac by simple words, either alone or in conjunction with another word or particle; as, foreknowing, Acts xxvi. 5; 200 alogo I predicted, Mark xiii. 23; Lois alogo he ran before him, or did outrun him, John. xx. 4; so with many others.

57. Syntax of Adverbs.

The repetition of adverbs, like that of nouns, expresses intensity; as, عدم very badly: or diversity; as, المُحَافِّ hither and thither: or continuation; as, مُحَافِّ by little and little.

Adverbs are used to qualify nouns by being placed sometimes before them, and sometimes after them; as, is a little water, is a few days, a few days, many widows, Luke iv. 25; and a little leaven, 1 Cor. v. 6. When are put before nouns, they seem themselves to be nouns, or to have the force of them, and might be translated, a little quantity of and a great quantity of respectively.

Adverbs derived from the names of nations ending in Al are found sometimes with and sometimes without a prefix; as, Alica, or Alica, or Alica, or Alica, Agyptiace.

Adverbs derived from the names of nations ending in Alica, or Alica, or Alica, and sometimes without a prefix; as, Alica, or Alica, and Egyptiace.

An adverb is expressed by means of a noun with ! prefixed; as, الْمُمُ a moment of time, الْمُمُ immediately, الْمُمُ مُومُلُولًا. Again, an abverb is formed by a noun with عبد prefixed; as, الْمُمُ astutely, الْمُمُمُ craftily, الْمُمُمُ diffusely.

58. Syntax of Prepositions.

The preposition is used with verbs of entering or exceeding; us, 1512 is used with verbs of entering or exceeding; us, 1512 is is used with verbs of entering or entering; us, 1512 is used with verbs of entering or entering; us, 1512 is used with verbs of entering or entering the door, John x. 1, 2.

with verbs of covering or commanding; as, made he cornered, Matth. xvii. 5; he commanded, 2 Chron. xxxvi. 23.

ns, God separated hand find he between the light and the darkness, Gen. i. 4.

i. 7: of going; as, "A he departed, John vi. 2; Lois he run, 1 Cor. xiv. 1.

The prepositions against, against, with, and many others, are frequently used with verbs; as, has accepted to the resist not evil; Matth. v. 39. See also Matth. xxvi. 62; Acts iv. 14; Rom. vii. 23; Acts xxv. 5; Hebr. vi. 6, &c.

The prefix - is sometimes not expressed, but

understood, before a noun in a state of construction; as, عَا اللهُ in my Father's house are many mansions, John xiv. 2. See also Acts vii. 20; xiii. 29.

The preposition followed by a noun is found to express, by way of periphrasis, an adj., or to give to the noun the sense of an adj.; as, is he was of the celebrated ones, i.e. he was celebrated, Assem. T. I. p. 426. col. 2. last line but one. have and that which is of the impossibles, i.e. and that which is impossible, ib. T. III. p. 605. is also to be met with as redundant. See Matth. i. 12; ii. 9; Assem. T. I. p. 54. l. 7. This preposition is also used as in the following example, is whom God hath raised from among the dead, Acts iii. 15.

After And other particles signifying between, various particles are used, which in English have the force of the conjunction and. 1st. The copulative of itself; as, India And between interior and exterior, Bar Heb. p. 473. I. 3. India India And between the armies and the chiefs, ib. 604. I. 17. 2nd. Lomad frequently; as, India India between Haran and Edessa, Bar Heb. p. 60. I. 13. India India between earth and heaven, ib. 275. I. 5; India India between you and the sons of the Church, Assem.

T. III. p. 307. last line. India Indi

**No; as, (or No Louis between him and them, Matth. xx. 17. As between me and thee, Bar Heb. p. 270, l. 19. Phase cours between them and the army, ib. p. 412. l. 19.

with prefixed to it; as, only on and between him and his mother, Bar Heb. p. 507. l. 16, 17. on and between him and the king, ib. p. 421. l. 2, 3. case he between thee and them, ib. p. 408. l. 10.

When is is followed by the prefix the two particles have the force of usque ad in Latin. looo missed in Latin. looo missed in Latin. loo missed like in Latin. loo misse

 $\hat{\mu}_2$ without, takes no affix; but when a pronoun follows, it is a separate pronoun; as, $\hat{\mu}_1$ $\hat{\mu}_2$ without me, John xv. 5.

A noun called by Agrell nomen nudum, i.e. a noun without prefixes or affixes, is used as a preposition; as, ii for, Bar Heb. p. 263, last line; iii for my life. iii; as, line in investigation, ib. p. 59. 1. 8.

59. Conjunctions.

A conjunction is on many occasions not expressed in a sentence, but understood. The conjunction o and (Asyndeton); as, i he arose (and) went.

A conjunction is repeated when the clauses of the sentence to which the said conjunction is appended are used correlatively; as, o.....o, Ex. xxi. 16;oi, Gen. xxiv. 25; رأ.....رأ, Rom. i. 16;oi, Matth. vi. 24. Different conjunctions are frequently employed in a sentence in this correlative manner; as, المُحَارِينَ أَبُرُ مُكَا إِنْ اللهُ ا

The particle , besides being a pronoun and a mark of the Gen. is also used as a conjunction. When it has the force of that. i.e. when it is causal, it is constructed with a verb in the future; but when it is used in another sense, it may be found with a præterite. See Matth. i. 22; ii. 8, 12, 15. &c. It is found in connection with many other particles; as, يان المارية wheresoever. في المارية wheresoever. Bar Heb. p. 328, l. 10. إحتار as that, John viii. 28, , also when that, ib. , and because, Bar Heb. 112, رَفَى دُلَّة بِ . after that, ib. 39, 7 دَلَّة بِ . lines 7, 8. Matth. xxvi. 22; Luko xxii. 20. علا في when, Mark iv. 20. , because, Mar Jacob's Scholia, p 1, 1. 3. , 5 because, Bar Heb. 158, 12. There are instances in which the conjunction is omitted, b) \j ha joi I go (that) I may catch fishes, John xxi. 3. Here is clearly an ellipsis of ; before ;o,1.

The copulative o has the force of that; especially after verbs of asking or commanding. Ephraim T. I. p. 84, F 6, 7; p. 446, D. 8, 9. In Job v. 7, o has the force of -1.

There are other conjunctions, which have exceptional uses. of is employed in making a comparison, and thus it performs the office which is usually assigned to ; as, "it shall be more tolerable for Tyre and Sidon in the day of judgment of than for you," Matth. xi. 22.

d is used with a formula of imprecation; as, "God

60. Interjections.

Interjections which denote threats have commonly the preposition of following; as, Eccles. x. 16, woe to thee. Matt. xxiii. 13, woe to you. 1 Sam. iv. 8; woe to us. See Matth. xiii. 7; xxiii. 13. Sometimes the preposition is in according to Amira, Gram. p. 449, in last of woe to this generation. When interjections are employed to express lamentation, the nouns which follow do not receive a preposition; as, with all also, my daughter, Judges xi. 35. See 1 Kings xiii. 30; Rev. xviii. 10, 16, 19.

is a particle of invoking as well as of affirming. See Gen. xxx. 34. عنه المعان O that is almost always joined with the particle عنه عنه عنه عنه المعان O that ye would bear with me, 2 Cor. xi. 1. See also Gal. iii. 4.

of behold! This interjection serves to mark emphatically the sentence, or that part of the sentence,

at the beginning of which it is placed. It is used especially where tempus or vicis is signified; as, is only to form he saith to him, behold, from his child-hood, Mark ix. 21. "That thou hast smitten me will be for behold, three times," Numb. xxii. 28. In the New Testament of is often found as the translation of the Greek particle hon; as, we have for the axe is now laid, Matth. iii. 10. With preceding, of is employed interrogatively. See Matth. v. 46.

Sometimes the verb is in the infin. with prefixed. See Gen. xliv. 7. Instead of the conjunction is found in 1 Sam. xxiv. 7, &c. — in it is found with a plu. affix, although the singular is occasionally met with, and a noun with following, to which the affix of the interjection refers. See Matth. v. 3; Ps. i. 1. Sometimes the noun is without . See Deut. xxxiii. 29,

61. Interrogatives.

 no particle to mark them; but which the context shews to be. In these cases the prominent word in the question commonly begins the sentence: مَا الْمُعْمَا إِنْ الْمُعْمَا الْمُعْمِعِيمَا الْمُعْمَا الْمُعْمِعِيمَا الْمُعْمَا الْمُعْمِعِمُ الْمُعِمِعِمُ الْمُعْمِعِمُ الْمُعْمِعِمُ الْمُعْمِعِمُ الْمُعْمِعِمُ الْمُعْمِعِمُ الْمُعْمِعِمُ الْمُعْمِعُمُ الْمُعْمِعِمُ الْمُعِ

A question with prodinarily comprises an affirmation; as, اَحُوْمُ اَوْدُوْمُ اَعْدَا رَصَا اللهُ عَمْ not ye that after four months cometh harvest? John iv. 35. When, however, a question is asked by عَمْ اللهُ اللهُ اللهُ اللهُ اللهُ اللهُ اللهُ اللهُ عَمْ اللهُ عَمْ اللهُ عَمْ اللهُ عَمْ اللهُ عَمْ اللهُ عَمْ اللهُ ال

The interrogation is sometimes continued by means of the disjunctive of to make, it would seem, the question more distinct and definite; as, ha ha are consonal of who hath sinned? this man or his parents? John ix. 2. John ix. 2. John ix. 2. John ix. 2. John ix. 3. See also Assem. T. I. p. 87.

The affirmation or denial of a question is usually made by keeping back the verb and pronoun, which define the question; as, ... 2 [2] (Note of the question) as, ... 2 [2] (Note of the question) have ye heard, my brethren, that which I have said? And they answered, We have heard every thing which than hast said. Assem. T. I. p. 375. 1. 7.

62. Enallage of Persons.

The enallage of persons does not occur so frequently in Syriae as in Hebrew, and especially as in the Hebrew Psalms; but some instances are met with in the Syriae Scriptures; as, Los Sico art inexcusuble, O man who judgeth his neighbour, where we have on for you Rom. ii. 1, i.e. the كَمَا مِنْ اللهِ الله a God like unto thee, forgiving iniquity, and passing by the transgression of the residue of his inheritance, and retainest not; where we have or 2024 for ,20212, Micah vii. 18, i.e. the 3rd. pers. for the 2nd. العصف مسد رومين سعير بيار رمية مي منفوا say to me, ye who wish to be under the law, where we have coons for coons, Gal. iv. 21, i.e. the 3rd. pers. for the 2nd. See also Isaiah xlii. 24.

63. Ellipsis.

This figure occurs most frequently in the omission of the substantive verb; as, and of and his name was Joseph. oragin if those who (are) like him, Bar Heb. 328. 12. There are other words which it is sometimes necessary to supply in order to complete the sense; as, a subs. in Eccles. vi. 3, light if a man shall beget a hundred, namely sons; and is understood, Psalm lexxix. 35; and it is understood, Psal

There are very many passages in which a verb of some kind or another has to be supplied, in order to complete the sense; as, which when? viz. wilt thou bring assistance, Ps. vi. 4; will come) upon thy people, Ps. iii. 9; the destruction of the impious and the wicked (will come) together, Isaiah i. 28. There are some sentences in which a word requires to be repeated, in order to obtain a full and connected sense; as, iii. 20. see also John xx. 31; Rom. v. 20; Heb. vii. 18, viii. 3.

An accusative is sometimes omitted; as, is the brought forth, viz. sons, Gen. xvi. 1; in he took viz. a wife, Nch. xiii. 25; if he cast, viz. the lot 1 Sam. xiv. 42. Also to in John ix. 7, some such noun as is is to be supplied.

A nominative is occasionally omitted; as, positive will (his anger) be retained for ever? Jer. iii. 5. There is also an ellipsis in the Hebrew.

A noun expressed in the early part of the sentence is not repeated in a following part with some genitive, although required by the sense, the genitive alone being put; as, is the glory as (the glory) of the only begotten of the Father, John i. 14. In the Greek, dofar is repeated. for another, I have a limit of the clothing was (the clothing) of hair, Matth. iii. 4. Another is greater than the testimony of John, John v. 36. In comparisons this mode of construction is prevalent, of which the last example is an instance. An ellipsis of a word expressing a definite portion of time; as, you a day, or had a year, is quite common.

63. Collocation of Words.

In general the collocation of words in Syriae is simple and natural; but in some instances it departs from the ordinary rules. A few of these instances it may be well to notice.

The verbs of and المحتفظة are sometimes so placed in a sentence that the grammatical connection of the former part with that of the latter is dissevered; as, المحتفظة المحتف

In a long sentence the verb is occasionally found at the end of it, and separated a long distance from its object; as, he made.....a banquet, Ephraim T. II. p. 210. D. 6...E. 3. The verb is also found separated by many words from its auxiliary; as, line of the control of the

A noun sometimes comes after both the verb and

its object; as, مَا الْهُ مُوا الْهُ مُوا الْهُ اللهُ اللهُ

There are instances of particles occupying unusual places; as the Adverb Africa in Mark i. 45; Africa openly to enter the city; $\hat{\mu}$ in $\hat{\mu}$ i

64. Syriac Metres.

According to Hahn, the first hymnologist of the Syrians was the celebrated Gnostic Bardesanes, who flourished in the second half of the second century. In this he is in some degree supported by Ephraim in his 53rd homily, against heretics, T. II. p. 553, where, although he does not actually assert that Bardesanes was the inventor of measures, yet he speaks of him in terms which show that he not only wrote hymns, but also imply that at least he revived and brought into fashion a taste for hymnology. These are his words: lained the for hymnology. These are his words: lained them (mixed) to musical sounds; he also composed psalms, and intro-

duced metres, and distributed words by measures and weights. These hymns were, according to the same authority, called by various names. They were denominated مُورِدُهُمْ, which word, according to Castell by Michælis, signifies Hymns consisting of many strophes, مُورِدُهُمُ poems, مُورِدُهُمُ songs, and الْمُورُمُ or الْمُورُمُ Psalms. It is stated that he wrote 150 Psalms in imitation of the number of the Psalms of David. Whether the poems bearing the different names here mentioned make together the number 150, or whether they are comprised in the المُورِدُهُمُ alone, is not certain.

Ephraim says that the heresy of Bardesanes became powerful, because the people were taught through poetry, and they were consequently influenced and charmed by the melody of his numbers. by this contrivance that he succeeded in infusing his poison into the minds of those who were attracted by the power of his teaching. He gathered around him a company of youths whom he taught to sing to the harp. Ephraim says, in T. II. p. 439. D, المعربة على على على على by the melodies of his Psalms he corrupted the youth. It is to be regretted that of the Hymns of Bardesanes, which it appears, in consequence of their high poetic merit, exercised an extensive influence over the religious opinions of the age in which he lived, and gave so much strength and popularity to his gnostic errors, a very few fragments only

remain. These fragments are to be found scattered over the works of Ephraim. It is to this holy father that we are indebted for all we know of the Hymnology of Bardesanes, and of the cause it was meant to serve. His testimony, however, after making some allowance for his zeal against the gnostic heresy, which determined him to concentrate all the powers of his mind to put it down, ought for anything we know to the contrary, be accepted as in the main correct.

On the subject of the metre in which Bardesanes wrote we must continue to speak on the same authority. At the foot of hymn 65 adversus scrutatores there are these words its the service made asola Here end seventeen hymns to the measures of the songs of Burdesanes. These hymns are numbered 40 to 65 inclusive. It is a pity that the Benedictine edition did not arrange them metrically, so that the measure of the verse might be at once presented to the eye. After a short examination, however, it may be ascertained that these poems are written in pentesyllabic verse, i.e. each line consists of five syllables. Hahn, in his "Bardesanes Gnosticus," p. 35, has given the first strophe consisting of twelve lines of the With hymn. The twelfth line is as follows, as Is I see glory to him who was pleased with him. This is a doxology, and such it may be observed is the last line of each strophe of the poem. It is probable that in the Church service, the custom was for the congregation, or the whole choir at least, to sing the doxology. In some poems, such as the 53rd, the doxology is found only at the end of the first strophe; but in such cases it is most likely that it was understood at the end of each of the others. There are other hymns, such as the 60th and 64th, that contain no doxology. Hahn conjectures that in these, the congregation might have used some one of the doxologies best known at the time. Sometimes the doxology consists of two or three verses, as in hymn 50, p. 19, D and E, where we have,

نَّهُ: حَمْدُهُ مَنْ مُرَاثِهُ مَا مُوْبِدُهُ مِنْ مُرَاثِهُ مِنْ مُرَاثِهُ مِنْ مُرَاثِهُ مِنْ مُرَاثِهُ مِنْ

Praise to him, who sent him Blessed be his coming.

Harmonius, the son of Bardesanes, stands next in the history of this subject, both chronologically and for his successful cultivation of sacred poetry. He is reported to have studied at Athens, and to have become well acquainted with the literature of the Greeks. Some writers have stated that he indeed was the first to compose hymns in Syriac, and they assign to him the honours, which by an almost general consent have been assigned to his father. This statement is not in any way confirmed by Ephraim, who, in consequence of his position and of the time in which he lived, is undoubtedly entitled to be regarded as the

How far the statement of Ephraim (p. 191) may be relied on, it may not be easy to say, but it is evident that he himself believed that the Edessenes were strongly influenced by poetry and music. Whether the motive he imputes to Bardesanes, which has been quoted, be correct or not, it is certain that Ephraim also made use of this instrument for counteracting the baneful effects which the writings of Bardesanes had produced. He looked upon these effects with great dismay, and expressed himself against them in the strongest terms. In his life, accompanying his works, Tom. VI. p. 53, by an anonymous author, he is made to say: cursed in he, who shall say, as he (Bardesanes) said: let him be anothema who shall believe, as he believed &c. Wo are told by this biographer what means Ephraim adopted to bring back the followers of Bardesanes to the pure doctrines of the Church. He established daughters of the convent, he taught them odes and scales of music and responses. Every day these daughters of the convent were gathered together in the church. Ephraim, as the father, stood in the midst of them, arranging and teaching them the various chants, &c., till all the city was gathered together to him, and the adverse party was confounded and defeated. The extant works of Ephraim prove that he must have diligently cultivated this art. A considerable portion of them consists of compositions in various metres. Whatever obscurity and doubt exist as to the origin of hymnology among the Syrians, it is certain that at no time subsequent to Ephraim did it reach a higher state of perfection than it attained to through the labours of that holy father.

I have already said that the metre in which Bardesanes wrote is pentesyllabic, i.e. that each line consists of five syllables. Metres in Syriac, so far as a knowledge of them has come down to us, consist not of a particular number of feet as in Greek and Latin, but of a certain number of syllables. Dr. Burgess, indeed, whose Essay on this subject in his "select metrical hymns and homilies of Ephraim Syrus," is by far the best with which I am acquainted, thinks that there are traces of an artificial arrangement of words, by which the sense is in some cases obscured, and that there might have existed among them a theory as to accent or quantity. If so, that theory

has not been discovered, and all that we can yet say of a Syriac metre is, that it is determined by a certain number of syllables. In this respect they are similar to the measures of our own hymns, except that the Syrians do not appear to have written much in rhyme. Thus the octosyllabic metre would correspond to our long metre. The shortest measure, so far as we are able to speak, was tetrasyllabic, and the longest dodecasyllabic. The intermediate measures are pentesyllabic, hexasyllabic, and octosyllabic. Not one of these metres seems to be confined to subjects of a particular character; but all of them are found employed in lively as well as in solemn compositions.

To meet the necessities of the metre we find that Synceresis and Diceresis are sometimes employed, of each of which we will now briefly speak.

 met with in verbs [2; as, [2]] μ, d'lo-mar; in Greek words beginning with Σ, which, in passing into Syriac, takes the initial]; as, σχημα Syr, [Δωμα] skimo. In words of three syllables, the vowel of the first is elided when the middle syllable has a long unchangeable vowel; as, [2ω] r'butho. In the middle of a word the vowel is sometimes passed over in the pronunciation: in verbs; as, [2ω] ethph'lag; in nouns, especially where the second syllable has the vowel is as, [2ω] alhutho. The vowel at the end of a word may fall away: in a verb, when the grammatical form will continue to be known, notwithstanding the vowel is omitted in the pronunciation; as, [2ω] Al'ph; [2] [2] sol'rath; in a noun, as, [2ω] pagr'.

There are instances where the first syllable of a verse is taken away and made in the pronunciation the last syllable of the preceding verse. Thus the deficiency in the first verse is supplied by the redundancy of the next. In hymn 51, Tom. III. p. 94, line 13, we have $\frac{1}{2} \int_{3}^{\infty} tsoro-pen$, where tsoro ends one verse, and pen begins the one which immediately follows.

Discresis lengthens a word by one syllable; so that monosyllables become dissyllables, &c. Discresis, therefore, performs pretty much the same office as *Mehagyono* (§ 9.). The difference between them seems to consist principally in this. Discresis gives the force of a vowel in the pronunciation, where there would

otherwise be a moving sheva, and Mehagyono exercises the same force where there would otherwise be a quiescent sheva. Examples are, cond halayhun: as if رَحْمَةُ; اِخْمَةُ methchze, pronounced in case of Diæresis metheheze; och schbak becomes in the same way schebak.

APPENDÍX.

It is stated in § 10, that a simple point is sometimes used for various purposes. The practice of the Syriac writers appears to have been to employ a point, which, by its position above or below the letter to which it is annexed, would determine the true signification of a word that would otherwise, in the absence of the vowels, remain ambiguous. It is probable that the position of this point defined in some degree the kind of vowel intended to be supplied, and thus served as a guide in the pronunciation. The following instances of its application, taken principally from the Grammars of Amira, Hoffman and the Dicu, will illustrate the nature and utility of this sign.

{	ဝ င်း ငဇာ	001 001	hc.
	rrù rrù	ين مح	she.
{	<i>(</i> टावं (वाव्	(0.00	they, mase.
{	دمن دمن	نورمن حرثي	they, mase.
}	رنو حرن	\sim	to her. to him.
	وئ مئہ		who t
			king.
₹	حدرا	خدراً خدراً	
(
1.1 }	الاعة المعن المع المع المع المع المع المع المع المع	کُونًا چَوْنًا آگیم آگیم	iniquity. infant. year. sleep.

It appears, from the foregoing examples, that this point performed the office of vowels; that when it was placed over the letter, it denoted for the most part one of the vowels, and when beneath the letter, it denoted, and when beneath the letter, it denoted and are supported by the letter.

This point was further used to distinguish the persons and tenses of verbs. When it was put beneath the letter, it denoted,

- 1. All the persons of the præterite, the first of the sing, numb, being excepted. The third person sing, fem. has this point frequently on the left-hand side of the last letter 4.
- 2. The imperative and infinitive whenever any point is found.
- 3. All persons of the future, the first of each number being excepted.

When it is placed above a letter in verbs, it denotes,

- 1. The first person of the prectorite.
- - 3. The first person of both numbers of the future.

The following paradigm of the Peal conjugation of will exemplify what has been now stated.

	Præterite.	
Fem.	Masc.	
ا پهڪي	والمهان	3rd pers. sing.
مهجه مهجه مهجه		
<u> جه</u> که	مكمه	2nd
		1st
جهذت	-	3rd pers. plu.
	<i>ج</i> لاف معام	
	(1800	180
	Insinitive.	
•	مجمهر	
	Imperative.	
	<i>الم</i> هولا	sing.
	مكملاب	plu.
	Future.	
Fem.	Masc.	
∥o%oċ	<i>⊘م</i> ا√ض،	3rd pers. sing.
		2nd
		1st
		3rd plu.
	رمكهمد	2nd
	المهاف	
	Participle.	
	Whi is	act.

This point in some places is found with one and in other places with another letter of the same word. The distinction is produced only by its situation above or below the word.

The Names of the Months.

We give here the names of the Lunar Months, which occur very frequently in the Scriptures.

LIST OF WORKS

PUBLISHED BY

DEIGHTON, BELL, AND CO.

Agents to the University.

- ALFORD'S (DEAN) Greek Tostament: with a critically revised Text; a Digest of Various Readings, Marginal References to Verbal and Idlomatic Usage; Prolegomena; and a Critical and Exceptical Commentary. For the use of Theological Students and Ministers By HENRY ALFORD, D.D., Dean of Canterbury.
